

# Furniture Board

## Basics

Shelves, side, back, bottom and top panels are furniture board.

### Strength

KCMA certified, sturdy, reliable-long lasting. Does not dent or distort easily.

### Certified composite material

ANSI A208.1 US Standard: Dense, consistently smooth, rigid, uniform, aesthetically attractive.

### Temperature & humidity stable

Durable, doesn't expand and contract going from dry to humid conditions; doesn't warp.

### Trusted material

Furniture board is used for flooring, shelving, siding, paneling, office furniture, household furniture, cabinets, countertops and many other products. It is a trusted material across a diverse range of industries.

### Savings over plywood

Cabinets cost less, kitchen remodel \$ dollar goes further.

Furniture board is made of reclaimed and recycled wood products, commonly referred to as particle board or engineered wood.
