GROHE | MASTERS OF TECHNOLOGY

**JEANNINE FISCHER**

Master of Technology, uses a force meter to determine how little pressure is needed to operate a lever fitted with GROHE SilkMove® technology.

# MASTERS OF TECHNOLOGY

GROHE's people have been regarded by their peers in the industry as Masters of Technology, because of their innovations, outstanding design and award-winning fittings.

By a combination of their advanced craftsmanship and their cutting-edge approach to effective teamwork and processes, our Masters of Technology take the lead in developing, designing and manufacturing our outstanding product range, all the while testing and fine-tuning each piece to ensure continued customer satisfaction.

The result: Timeless design. And quality that lasts a life-time.

Again and again GROHE products surprise users with unique features that provide "Pure Freude an Wasser". When you use a GROHE product you can feel the difference. Time after time.

Take, for example, the new GROHE Eurocube® Joy faucet ranges. The design is reduced to perfectly square shapes. It is a cosmopolitan offering, created to complement the most modern of interior spaces. Its pure cubic form and flawless surfaces radiate precision craftsmanship. The increased spout height is designed to offer greater ease of access and user comfort. At the same time the GROHE FeatherControl cartridge offers light-as-a-feather operation and precise control of water flow and temperature, guaranteed to last for the life of the tap.

Another feature of GROHE Eurocube® Joy is the lasting quality of the surfaces. Thanks to the GROHE StarLight® coating the faucet is incredibly scratch resistant, meaning the dazzling surface won't mark or tarnish.

# VERY SQUARE VERY COOL ENJOY GROHE'S CUBE LINES

GROHE Eurocube® faucets, Euphoria® Cube and Sena Cube shower products, and GROHE Essentials Cube bath accessories “round out” a complete offering of bathroom lines focused on square and flat -edged design elements. As the “Cube” name suggests, the geometry of these four new bath lines incorporates precision-crafted pure forms and flawless, mirror-like surfaces. The new GROHE lines are a perfect complement to bathrooms inspired by clean, unadorned lines and purist minimalism. Apart from the popularity of this motif in modern bathroom design, GROHE Eurocube®, Sena Cube, Euphoria® Cube and Essentials Cube offer an excellent price-performance value.

## A Long Term Design Statement

Clear and straight silhouettes are firmly established elements in renowned designers’ repertoires. GROHE takes this concept to the next level by almost completely avoiding rounded and cylindrical elements. Parallel lines, elegant surfaces and well-balanced squares are timeless features in a design which will retain its attraction in day-to-day use.

## Aesthetic Consistency Throughout Your Bathroom

Taking clear, geometric design to a higher level, Eurocube® is the ideal choice for architects and designers, as well as the homeowner creating his or her dream bathroom. GROHE takes its unmistakable Cube design and applies it to faucets, tub fillers, shower valves, hand showers, shower heads, and bathroom accessories. Refined and honest, as with all GROHE Cosmopolitan-styled faucets, the new Cube designs are a meticulous balance of style and functionality. Influenced by modern architecture, they fuse bold geometric shapes with advanced engineering.

## Performance Features

- The smooth, precise action of **GROHE SilkMove®** ceramic cartridge technology for lifelong, effortless water control. Lifecycle tested to over 200,000 operations simulating 14-20 years of typical residential use for a family of four.
- **GROHE StarLight®** technology creates a deep, luxurious chrome finish that is soil repellent, scratch resistant and non-tarnishing. The result: a color-fast, good as new appearance for years to come.
- **GROHE DreamSpray®** technology – advanced shower engines efficiently distribute an equal flow of water to every single nozzle for a shower experience that is second to none.

# GROHE EUROCUBE®

For a sharp, tailored look in your bathroom choose Eurocube. Here is a design so cleverly engineered that we are able to offer three distinct faucets, tub filler, tub spouts, shower arm and shower valves... all featuring true square design.

The minimalist Eurocube faucet spout features a chamfered underside which positions the aerator at the optimum angle to ensure a perfect water flow directed to the center of the bowl. For superior ergonomics, the handle lever rises at a seven-degree angle, a signature element for GROHE designs. The handle is accentuated by an eye-catching cut-out which makes the faucet appear less rigid and open, lightening and softening its overall appearance. Having truly maximised the creative potential of square and cubic shapes, GROHE has created a design that is not expected in the market at this attractive price point.
