

Care and Maintenance

Glass Tiles:

For routine cleaning, use any non-abrasive cleaning compound recommended for glass.

Metal Tiles:

To clean, use a liquid non-abrasive household cleaner.

Do not use any abrasive products such as: scouring pads, steel wool, etc. Avoid cleaners containing ammonia, bleach, abrasives, or other hazardous/polluting compounds.

Always test in small area while using a new cleaner to ensure compatibility.

Stone Tiles:

Use cleaners specifically designed for cleaning stone. Natural Stone products are porous and should be cleaned with neutral cleaners. Stone cleaners should never contain acid or bleach as they may damage the stone.

Always test in small area while using a new cleaner to ensure compatibility.
