

# HOW

# KLEEN KOTE

# WORKS

MICRO PORES ARE PRESENT IN ALL SURFACES ;  
THEY COLLECT DIRT, DEBRIS, SALT AND OTHER CONTAMINANTS ALLOWING ANY EXPOSED  
SURFACES TO PIT, RUST OR CORRODE, WEAKENING THE PRODUCT SURFACE.

A THIN LAYER OF KLEEN KOTE FILLS IN THE MICRO POWRES, PREVENTING STICKAGE  
AND REPELLING CORROSIVE DEBRIS AND CONTAMINANTS.

***\*\*KLEEN KOTE 100 must be mixed before applying to the surface. DO NOT use in its concentrated form.***
