

# Murphy Bed Use and Care Manual

## Thank You for Your Purchase

We appreciate your choice of our Murphy bed. This innovative space-saving solution is designed to provide comfort, functionality, and style for your home. Please read this manual carefully to ensure safe and proper use.

## Safety Instructions

1. **Weight Limit:** Do not exceed the weight limit specified for your Murphy bed. Overloading can cause damage to the mechanism and pose safety risks.
2. **Children:** Do not allow children to operate the bed without supervision. Ensure they do not play on the bed frame or mechanism.
3. **Clear the Area:** Ensure the area around the bed is free of obstructions when folding or unfolding the bed.
4. **Secure the Bed:** Always ensure the locking mechanism (if applicable) is engaged when the bed is folded up.

## Operating Instructions

### To Open the Bed

1. Gently pull down the handle or front panel.
2. Use two hands to guide the bed frame as it lowers.
3. Ensure the legs are fully extended and securely locked into position.

### To Close the Bed

1. Remove all bedding items that may obstruct folding (e.g., bulky blankets).
2. Fold the legs inward and lift the bed frame evenly.
3. Securely push the bed into the cabinet until it clicks or locks into place.

## Care and Maintenance

### **1.Cleaning:**

Wipe the surface with a soft, damp cloth. Avoid using abrasive cleaners or harsh chemicals that may damage the finish.

For wooden or laminate surfaces, use a furniture-safe cleaner.

### **2.Lubrication:**

Inspect the hinges and mechanism every 6 months. Apply a small amount of lubricant to moving parts to ensure smooth operation.

### **3.Tighten Screws:**

Periodically check and tighten any loose screws or bolts to maintain stability.

### **4.Bedding:**

Use lightweight bedding that fits comfortably within the bed frame when closed. Avoid overly thick or heavy items that may prevent the bed from folding properly.

### **Tips for Longevity**

- Avoid excessive force when operating the bed to prevent wear and tear.
- Store the bed in a dry environment to prevent damage to the materials.
- Keep the mechanism free of debris and dust to ensure optimal performance.

### **Troubleshooting**

- Bed does not fold properly: Check for obstructions and ensure the legs are fully folded.
- Noisy operation: Apply lubricant to the hinges and inspect for loose parts.
- Mechanism feels stiff: Ensure the bed is balanced and the weight is distributed evenly.
