

INSTALLATION INSTRUCTIONS FOR CASING

TOOL REQUIRED:

- Hammer/ Nail gun/ Glue
- Finish nails
- Measurement Tape

CONTENTS

- 2 Legs – 84 inches with 45 degree cut
- Top piece of casing

INSTALLTION STEPS

STEP 1 PREPARE THE AREA:

- Remove any plastic or cardboard packaging from the door casing, ensuring the clean surface is exposed for installation.
- Check that the door jamb and surrounding area are clean and free from any obstructions.

STEP 2 MEASURE AND MARK

- Using a measuring tape and pencil, mark a distance of 1/4 inch from the edge of the door jamb, going from the inside to the outside. Make these marks along the length of both sides of the door jamb.

STEP 3 ALIGN THE CASING

- Position the top part of the casing above the door jamb, aligning the pre-cut 45-degree angle with the top of the jamb

- Make sure the casing fits snugly against the jamb, with the angled portion covering the top edge of the jamb.

STEP 4 HORIZONTAL ALIGNMENT

- Use horizontal marks on top of the jambs as a guide for placing the casing. This ensures that the casing is level and correctly aligned with the top of the door jamb
- With the casing in the correct position, use a nail gun or appropriate fasteners to secure it in place.

STEP 5 VERTICAL POSITIONING

- The vertical part of the casing (leg) (the side with the 45-degree cut) should be precisely on the mark you made earlier on the vertical position of the jamb.
- With the casing in the correct position, use a nail gun or appropriate fasteners to secure it in place.

STEP 6 REPEAT FOR THE OTHER SIDE

- Repeat the same process for the casing on the other side of the door. Ensure equal spacing and alignment for a balanced look.

STEP 7 FINISHING TOUCHES

- Once both casings are installed, check for any gaps or unevenness
- If necessary, use wood putty to fill any gaps and sand the casing for a smooth finish

STEP 8 PAINT OR STAIN (OPTIONAL)

If desired, you can paint or stain the casing to match your interior decor and preferences. Ensure the paint or stain is applied evenly for a professional look

STEP 9 ENJOY YOUR UPGRADED DOORWAY

- Stand back and admire the beautiful, finished look of the door casing with its clean lines and polished appearance
- Enjoy the enhanced aesthetics and the touch of elegance it brings to your space
