

# Quality Materials + Quality Processes = Quality Pump

The design, construction, materials, and production of King Innovation's Siphon King Utility Pump takes place in the USA.

## Siphon King Utility Pump Made in USA

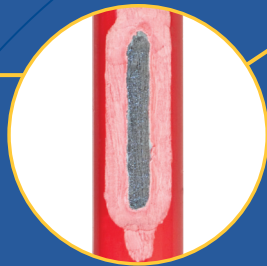

High strength polymer material ensures the handle can withstand extreme abuse

Impact tested handle for extra durability

Rust resistant metal screw secures handle to metal shaft

Steel shaft improves strength

Exterior threads on output tube discourage pull out and improve water flow

Patented inner seal prevents leaking (US Patent #7,726,231)

Two part molding process locks diaphragm in to survive the most severe conditions

Flexibility in hose

Rust resistant metal screw secures plunger to metal shaft

Durable foot can withstand prolonged use and has threading for easy removal when cleaning
