

Installation Instructions for 8-Inch Widespread Faucet

Model: LT-B0202CLS

Tools Required:

- Adjustable wrench or pliers
- Faucet key (if applicable)
- Measuring tape
- Level
- Teflon tape or pipe thread sealant
- Bowl wrench (optional)
- Drill (if installing holes for deck mount faucet)

Before You Begin:

1. **Turn Off the Water Supply:** Shut off the main water supply valve or shutoff valves under the sink before beginning the installation.
2. **Remove Old Faucet:** If replacing an old faucet, disconnect and remove the old one from the sink.
3. **Prepare the Sink:** Ensure your sink has appropriately sized holes for the faucet. If not, use the drill to create new holes according to the faucet's specifications.

Steps for Installing Your 8-Inch Widespread Faucet:

1. **Apply Sealant:** Wrap Teflon tape or apply pipe thread sealant on the faucet's base and cartridge.

2. **Faucet Body Installation:** Place the faucet body (valve body) into the sink hole and tighten it with a wrench. Make sure the faucet is aligned and level.
3. **Hot and Cold Supply Lines:** Connect the hot and cold supply lines to the faucet valve body, ensuring they are securely fastened.
4. **Faucet Handle and Spout Installation:** Install the faucet handle and spout onto the valve body, using the faucet key or a gentle twist by hand.
5. **Check for Leaks:** Turn on the water supply and check for any leaks at the connections. Tighten as necessary.
6. **Test Faucet:** Test the faucet for proper functionality. Check the hot and cold water, spray pattern, and whether the handle operates smoothly.
7. **Finishing Touches:** Clean up any debris or fingerprints on the faucet, and ensure everything is working correctly before use.

Troubleshooting:

- If there are leaks after tightening all connections, reapply sealant and try again.
- If the handle does not operate smoothly, check that it is properly attached and not blocked.
