Quiet Comfort – Dependable Performance Guaranteed – Energy-Efficient

Mini-Splits

Single-Zone & Multi-Zone Systems

Comfort. Performance. Value.

The Garrison ductless mini-split system couples unparalleled energy efficiency with an elegant appearance, and provides maximum comfort and value. Our line of energy-efficient products excels in both single- and multi-zone ductless applications. They are also a good choice for spaces where extending or installing ductwork is not feasible.

Featuring inverter technology with eco-friendly R-410A refrigerant, Garrison products will save energy by reducing the losses often associated with central air ductwork, reduce outdoor noise, and keep spaces comfortable with smaller temperature fluctuations.

1-Year Limited Warranty

1-year limited warranty
on entire unit

5-year limited warranty
on sealed system

Top Reasons to Choose a Mini-Split System:

- Effective, efficient cooling/heating in one or multiple areas
- Enhanced temperature control by allowing different zones to be set at different temperatures
- Ductless design protects from the spread of allergens due to poor duct cleaning and maintenance
- Small size and flexibility, allowing for use in a variety of spaces; does not require a window or floor space

Garrison ductless mini-split systems provide year-round comfort, room-by-room, for many types of rooms. Designed for quick installation, these long-lasting units are ideal for new construction, or as a replacement solution.

**Exceptional warranty support is offered through the
Garrison technical support center.
Call (888) 498-0439.**

*Applies to most mini-split models; product specifications available online

A DUCTLESS MINI-SPLIT SYSTEM CONSISTS OF:

1

Outdoor
Condensing Unit

2

Air handler unit,
mounted high on an
interior wall

3

Refrigerant and
electrical lines installation
kit connects units through
small openings

Garrison Mini-Split Systems Feature:

- Easy Installation
- High Energy Efficiency
- Turbo Mode for Quick Cool Down
- Remote Control
- Ultra-Quiet Operation
- Auto-Restart After Power Loss
- Uses Eco-Friendly Refrigerant
- Refrigerant Leakage Detection
- Smart Inverter Technology Maintains Temperature Control
- Comfort Care Design to Control Airflow

CHOOSING A UNIT

SINGLE-ZONE

MULTI-ZONE

CHOOSING A UNIT

Identify the BTU needed for each space by considering the size of the room, type of activity, and average amount of people for each room. A higher BTU may be needed based on occupancy and activity levels.

ROOM SIZE GUIDELINES

BTU	5,000	6,000	7,000	8,000	9,000	10,000	12,000	14,000	18,000
Room Area (sq. ft.)	100-150	150-250	250-300	300-350	350-400	400-450	450-550	550-700	700-1,000

Choose from the available combinations of mini-split units based on the cooling/heating (BTU) required.

SUGGESTED CONFIGURATIONS BASED ON BTU

	BTU RANGE REQUIRED	1 UNIT	2 UNIT COMBOS	3 UNIT COMBOS	3 UNIT COMBOS
Garrison 2-Zone Outdoor Condensing Unit	12K-24K	9 12	9+9 9+12 12+12		
Garrison 3-Zone Outdoor Condensing Unit	18K-36K	9 12 18	9+9 9+12 9+18 12+12 12+18 18+18	9+9+9 9+9+12 9+9+18 9+12+12 12+12+12	
Garrison 4-Zone Outdoor Condensing Unit	24K-36K	9 12 18	9+9 9+12 9+18 12+12 12+18 18+18	9+9+9 9+9+12 9+9+18 9+12+12 12+12+12	9+9+9+9 9+9+9+12

MINI-SPLIT SYSTEMS

SINGLE-ZONE SYSTEMS

Includes Indoor Air Handler and Outdoor Condensing Unit

ITEM NUMBER	COOLING CAPACITY (BTU)	HEATING CAPACITY (BTU)	MAX. AMPERAGE	EER	SEER	VOLTAGE
3555008	9000	9800	10/15	14	22.8	208/230
