Deck Block

For your convenience, we also handle concrete lintel units, concrete sill units, 4x8 vent block, LL vent block, reinforcing wire, cavity caps and sand-blended masonry cement.

Packaged Cement

High Strength Masonry Cement: High Strength Masonry Cement can be used for all facets of masonry construction, including concrete block, decorative stone and brick.

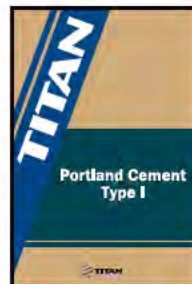

Type "N": Type "N" Masonry Cement is a general purpose product specifically designed for use in above-grade applications with products such as concrete block, clay brick, glass block and stone.

Stucco Cement: Stucco Cement provides a smooth, workable mix that retains good consistency and develops a strong bond. This product can also inhibit moisture penetration.

White Masonry: White Masonry Cement has a proven track record for many applications, but is typically used where a pleasing aesthetic accent is desired in masonry construction.

Portland Cement Type 1: Type I is a general purpose cement widely used in all types of concrete construction. Typical applications include slabs-on-grade, curbing, foundations, paving and floors.

Portland Cement Type 2: Type II is formulated to give excellent durability in construction jobs that may require the concrete to withstand exposure to harsh environmental conditions.

Portland Cement White: Portland White is most often used in finish applications requiring an aesthetic appeal, including finish cement, stucco, colored concrete and other decorative masonry units.
