

CARE AND MAINTENANCE

Your Karran quartz sink is produced from the highest quality natural quartz crystals and acrylic resins. With the right care it will last a lifetime.

Cleaning and caring for your quartz sink is easy. Simply follow the reference guide given below.

Normal impurities (residue from washing up)

Clean your sink with water, liquid dishwashing soap and a sponge or cloth, then dry. This should be done after every use.

Metal abrasions (pots, pans and cutlery)

Use a rub-out sponge (Mr. Clean Magic Eraser sponge). Follow up by cleaning your sink with water, liquid dishwashing soap and a sponge or cloth, then dry. Do this whenever necessary.

Lime stains and rust

Use vinegar or a commercial lime and rust remover. With vinegar, dilute 50% with water and let it soak into the affected areas for 20 minutes. Rinse thoroughly then dry. With a commercial lime and rust remover, follow directions for use on packaging, then rinse sink thoroughly and dry. Do this whenever necessary.

Stubborn stains

Mix 1 part household bleach with 15 parts water and let soak in sink for 1 hour. Drain, rinse thoroughly and dry. Do this whenever necessary.

These simple maintenance tips will keep your sink looking its best for years. To prevent permanent damage to your sink:

- Do not place hot pots or other hot items directly onto the sinks surface. Let them cool completely before placing them on the sinks surface.
- Do not use the sink as a cutting board. While quartz is incredibly durable, sharp knives may cut into the surface.
- Do not clean the sink with abrasive cleaning pads and powder detergents. This may dull and damage the sinks surface. If needed a nylon brush can be used.
- Strong alkalis (ammonia and caustic soda solutions) must be avoided.

Luster Pro cleaning oil, available from your local Karran dealer or by calling Karran USA directly, is a specially formulated oil-based cleaning solution. It is perfect for giving your quartz sink that extra shine and sparkle when needed.
