

FAQ

WHAT IS PPG + SCENT?

PPG + SCENT is an odor control paint additive. When added to paint, the result is a long-lasting air freshener that helps eliminate odors and refreshes rooms.

HOW DO I USE PPG + SCENT?

Simply pour 1 ounce per gallon of paint, shake or stir thoroughly, then paint as usual.

HOW STRONG IS THE SCENT?

PPG + SCENT provides a gently scented atmosphere. During the painting process, the scent level will be stronger than after the paint has dried. The ratio of mixing 1 ounce per 1 gallon of paint produces a very subtle, pleasant scent. For a milder scent, use less. For a stronger scent, use more.

HOW LONG WILL THE SCENT LAST?

PPG + SCENT produces a pleasant scent for approximately 3–4 months and possibly longer under optimum conditions. For best results, we recommend using PPG + SCENT in both the primer and topcoat.

CAN PPG + SCENT BE USED WITH SOLVENT PAINT?

PPG + SCENT can be used with any latex or solvent paint and will not affect the paint's color, quality, or application.

WHERE CAN PPG + SCENT BE USED?

PPG + SCENT is ideal for homes, rentals, occupied spaces like hotels and offices, and multi-unit housing like apartments and military housing.
