This pesticide is toxic to fish and aquatic invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product too close to streams, rivers, or lakes may result in contamination of drinking water or groundwater.

For human exposure:

If in eyes: rinse with large amounts of water for at least 15 minutes. If not improved, see a doctor.

If swallowed: rinse mouth with water and seek medical treatment immediately.

For animal exposure:

If in eyes: rinse with large amounts of water for at least 15 minutes. If not improved, see a veterinarian.

For container:

Do not refill this container unless the directions for use allow a different (concentrate) product to be used. Turn the nozzle to “OFF” position and store with sprayer above the level of liquid in container to prevent leakage. Store in original container in an area inaccessible to children and pets. Always store with the sprayer nozzle off and with a protective cap over the valve.
