ADFORS

Pet Resistant Screen

Get your paws on America's toughest screen

Resists tears and damage caused by pets

Your partner for innovative textiles

Pet Resistant FAQ

Will this prevent my pet or child from running through the screen?

No. This will withstand light pressure and will resist tears.

Why is ADFORS screen flame resistant and the competition's screen is not?

ADFORS screen was tested per the ASTM standard test for flame resistance. Our coating is specially formulated to contain flame-resistant properties.

What are ASTM tests D3656 and D6413?*

These two tests measure the flame time, flame height and char length of the screen when exposed to a flame source and after removal of the flame source.

*Testing results available upon request.

What is new and improved about this product?

ADFORS Pet Screen is now ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processibility that our screen has always had. We have also now achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.

Ultra-strong Pet Resistant Screen for strength, durability and safety.

Designed to resist damage caused by household pets, ADFORS Pet Resistant Screen is more durable than traditional fiberglass screen thanks to its thick, tear-resistant polyester yarn. It can be used in any door or window and is a smart solution for those who repeatedly have to replace screens.

ADFORS Pet Resistant Screen is the only one on the market whose coating makes it flame resistant by passing the ASTM requirements D3656 and D6413 as well as ISO11925-2. Visit www.adfors.com to see the flame tests completed using ISO11925-2 testing standards. ADFORS is also leading the industry by making our full line of fiberglass and polyester screen ortho-phthalate free, ahead of industry standards.

Features and benefits of Pet Resistant Screen:

- Heavy duty screen prevents tears and damage from household pets
- Ideal for areas where pets or children push against the screening
- Durable, yet still allows for excellent outward visibility and airflow

Flame Resistant

The ONLY flame-resistant Pet Screen on the market

Pet Resistant Screen is available in DIY pre-cut and contractor rolls. Each pre-cut roll comes with simple step-by-step instructions for easy installation. ADFORS .125" spline is recommended for the best fit in a standard frame. Pet Resistant Screen is also available in a kit which includes screen, spline and an installation tool to upgrade the screen in an existing door or window frame.
