Clear Advantage™ Screen

For better visibility, the choice is clear

Your partner for innovative textiles

Clear Advantage FAQ

Does Clear Advantage meet industry standards?

Technically there are no industry standards for such a fine screen product (.008"). Clear Advantage exceeds minimum industry standards in both tensile strengths and bursting strength.

What other differences exist between Clear Advantage and standard screen?

In Clear Advantage, the fiberglass strand is a finer gauge which helps make the average weight of the product 30% lower than the industry standard.

How is Clear Advantage less visible than standard fiberglass screen?

Our use of color and unique design allows for increased light absorption and less light reflection creating lower glare and making the product less visible to the naked eye.

What is new and improved about this product?

Clear Advantage Screen is now ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processability that our screen has always had. We have also now achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.

Clear Advantage™ is the clear-cut choice for premium quality and clarity.

ADFORS Clear Advantage™ is the clear choice for high visibility screen. Clear Advantage screen features low diameter fiberglass yarns which, when combined with more yarns per inch, provides the optical illusion that the screen is invisible.

As a premium screen product, Clear Advantage is tested using ASTM D3656 standards. ADFORS is also leading the industry by making our full line of fiberglass screen ortho-phthalate free, ahead of industry standards.

Features and benefits of Clear Advantage Screen:

- Allows up to 50% more natural light and dramatically improves airflow versus standard screening
- Practically undetectable from the exterior which enhances the curb appeal of your home or office
- Finer mesh and weave provides greater insect protection than standard screen

Clear Advantage screen is available in DIY pre-cut and 100' and 600' contractor rolls. Each pre-cut roll comes with simple step-by-step instructions for easy installation. ADFORS .140" spline is recommended for the best fit in a standard frame. Clear Advantage is also available in a kit which includes screen, spline and an installation tool to upgrade the screen in an existing door or window frame.

Visit www.adfors.com to learn more about our products, view our how-to videos and use our screen selector tool to make sure you have the right screen for your needs.

Window above shows standard screen on the left versus Clear Advantage screen on the right.
