how to
WELCOME your NEW PLANT HOME

1. REMOVE YOUR PLANTS FROM THEIR ENCLOSURE
Pull the packaging open carefully, as soil may have shifted during transport.

2. CHECK IF YOUR PLANT IS THIRSTY
Your plants were watered right before shipping, but they may have become thirsty during travel. If the soil is dry to the touch give your plants a good drink before planting.

3. LET YOUR PLANTS GET USED TO THEIR NEW ENVIRONMENT
Let them sit in a warm, sunny spot for 24 to 48 hours to regain their strength.

---

Something wrong?

Bonnie Plants guarantees that your plant will make it to you alive, or we'll offer you a replacement. If your plant didn't arrive as you had hoped, contact us at Orders@bonnieplants.com and will work to make it right!

---

OUR STORY
We've spent the last 100 years helping folks like you grow their own food. Started in 1918 by Bonnie & Livingston Pauk, we remain a family company today, under the leadership of Bonnie's grandson. A lot can change in 100 years, but one thing has stayed the same: Bonnie Plants' belief that when you start with high-quality plants, growing veggies and herbs is something anyone with a little patch of sunlight can do—even if your "garden" consists of a pot of herbs in your balcony.
