YELLOW FLOATING SILT FENCE

Suggested Installation Instructions:

1. Determine the endpoints of the barrier and install anchors.
Anchors can be steel or wood posts, concrete pillars or some existing sturdy structure the barrier can be connected to.
2. Unroll the barrier and spread it out. If you need more than one barrier, unroll the additional barriers and join them with locking ties using the grommet holes.
3. Use the locking ties to attach the cover to the drain, by inserting each end of the locking tie through the plastic stress plate.
4. Slide the barrier into the water using a boat to guide the sections into place.
