Precautions before Assembly

1. If any parts are scratched or damaged , please contact the seller or Innovaze customer service for partial refund and replacement parts.
2. The smell of PU wood paint will be greatly reduced after 1-3 days.
3. Do not tighten all screws until last step. Fixing a single wooden part too early may make other components difficult to assemble.

1. Note: Part A can be moved back and forth in a small amount to make the screw pass through the two holes smoothly.

2. Note: Please distinguish between Part C and D. The washer must be assembled on the same side as the nut.

3. Note: Part H, the eyebolt, has two metal washers, one on the inside and one on the outside.

4. Note: Please use the tools provided to tighten all the screws (especially the eyebolts) to make the swing stable and have the maximum load-bearing capacity.
