

Novocanto® PVC

Novocanto® PVC is a rounded shape profile made by extrusion of rigid PVC. This profile has been designed to protect and decorate outside corners in ceramic installations. Its main function is preventing from mechanical damage and increasing the utile life of the installation. Available in a wide range of plain and decorate colors to fit any environment.

General features

Material:	PVC
Length:	2,5 m.l. (8ft2in)
Measures:	h: 6, 8, 10, 12 mm. (1/4, 5/16, 3/8, 1/2")
Packaging:	100 u./box

Finishes

Applications

Novocanto® PVC is a profile intended to protect and decorate edges in wall ceramic installations. It can also be installed as a medium-height finish.

It is an ideal product for bathrooms, kitchens, medical clinics, restaurants, etc. Its design is versatile and is appropriate for homes, offices, public buildings or facilities with strict cleanliness requirements.

Technical features and Tests

Fire resistance	M2 (NBE-CPI-96)
Abrasion resistance	Very good
Working temperature	14°F / 140°F - 10°C / 60°C
Resistance to chemical agents	Good except to chromic and sulphuric acids and organic solvents as acetate and toluene.

AIM-PLAS

Materials

Novocanto® PVC is a profile made of PVC (polivinyll chloride).

El PVC (polyvinyl chloride), is a polar amorphous thermoplastic polymer highly resistant to abrasion, corrosion and a wide range of chemical products. It has a good resistance to impact, low water absorption, low electrical conductivity and it is dimensionally stable.

*Find out more information by consulting the Technical Files of the raw materials in our website www.emac.es

Installation

To see the video, capture this image with your mobile phone (QR code reader software is necessary) or click on it.

1. Tile one of the sides of the wall to be tiled. Then, spread a big amount of thin-set mortar on the other side.
2. Place the profile aligned to the corner and press it to let the thin-set mortar pass through the holes on the anchoring wing.
3. Place tiles along the anchoring wing and continue pressing to get an optimal adhesion.
4. Continue tiling the wall.
5. Finally, clean the leftover material, remove the protective film if necessary and let dry.

Cleaning and maintenance

The cleaning can be done with water and detergent or specific cleaner disoluted. The correct use of bleach do not affect PVC.

It is not recommended using chromic acid, sulfuric acid or organic solvents as ethyl acetate, acetone or toluene.
