- Mr. Clean
- Nail Polish Remover
- Scouring Pads
- Ammonia
- Tough Act
- Powder or Crystal Drain Cleaners
- Greenworks Bathroom Cleaner
- Scrub Free w/Bleach
- Seventh generation bathroom cleaner - regular
- Magic Eraser

Monthly Maintenance

It is recommended that once a month the tub is flushed. As well, with every month of normal use, clean out the pumps inlet cover (shown right) by unscrewing the cover (counter clockwise) and removing any hair and debris from the cover and housing. Remount the cover in place. Never operate the system with the cover off, as the pump creates a strong suction and damage to the pump or injury may occur.

Recommended Acrylic Cleaners

Acrylic tubs provide customers with a better quality tub vs gel coat tubs. Unfortunately, these tubs can scratch if cleaned incorrectly. The way to proceed is gently, very gently. The good news: gentle cleaning does not translate into high maintenance. On the contrary, you'll probably save some cash by foregoing pricey chemical cleansers. Here's how to clean your acrylic tub safely and naturally: Wash your tub often, at least once a week, and use a mild soap -- plain old dishwashing liquid is best -- with lots of hot water. Most dirt will simply wash off with clean water. We recommend using liquid dish washing soap such as Joy, Palmolive or similar. Clorox bleach, Windex, ammonia based glass cleaners, Formula 409 and Fantastic are stronger cleaners that are also safe to use. Always clean with a soft sponge. Never, ever use abrasive cleaning products (those containing fine grit; check the label) or abrasive cleaning pads. Use of these chemicals will destroy the acrylic and void your warranty. Waxing is another no-no. Your acrylic tub is naturally very shiny and designed to stay that way without additional help. Lastly, is your water supply kind of alkaline? If so, you might notice a little hard-water buildup appearing over time. The easiest fix, believe it or not, is plain white vinegar. Spray a 50/50 mix of water and vinegar on the affected areas and let it soak for a while. Rub gently, then rinse.

If you would like a deeper clean than the recommended dish soap and hot water, you can try some of the products listed below that have been approved for use with Acrylic.
