

Professional Juice Extractor

Brushed Stainless

Model # JEX328

The Waring Pro® Juice Extractor lets you get the most out of your favorite fruits and vegetables. Ideal for today's fast and healthy lifestyles, the Juice Extractor is engineered to make the process easy. More juice is extracted from less produce, leaving only dry pulp in the Pulp Collector. That means no mess while processing, and quick and easy cleanups. An extra wide feed tube minimizes preparation time, and the convenient ON/OFF toggle switch is simple to use. The efficient metal design has fewer parts to clean, is easy to assemble, and makes this attractive machine a pleasure to own and operate. Drink to your good health, with Waring.
