Crown Moulding Shelf

Crown Moulding Shelf

Thank you for choosing a Magellan shelf for your organizing and display needs. We trust you are pleased with the quality and style of this product. If you have any questions or comments, we welcome your call at (800) 582-7021.

We recommend that this shelf be installed into wall studs and have included the wood screws to do so. If you wish to install the shelf into a hollow wall or drywall, you can purchase molly bolts or hollow wall anchors at a hardware store.

Crown Moulding Shelves

Installation Instructions

STEP 1 - There are two wood installation blocks included with the shelf. The shelf has a groove on the under side that fits over the lip of each installation block. Determine the desired location of the shelf, then using a level, make a light pencil mark where the top of each installation block will be attached to the wall over the studs. Space the blocks far enough apart that the shelf will be well supported at each end.

STEP 2 - Using a 1/8" drill bit, mark the drill holes by pushing the bit through the screw holes on each installation block so the bit makes a dent or mark on the wall.

STEP 3 - Drill the holes, then install the installation blocks using the screws provided.

STEP 4 - Set the shelf snugly over the installation blocks. For added stability, a small finishing nail may be tapped down through the top of the shelf into each of the installation blocks.
