Training with the Football Target Net

The 8' x 8' Football Target Net was developed by GoSports in collaboration with professional football coaches to deliver a valuable training tool for QBs and football players of all ages and abilities.

Training with the Football Target Net can help players develop greater throwing accuracy thanks to the 3 separate targets to throw to. Coaches can incorporate the targets easily into snapping, throwing, and short passing drills just to name a few. Each target is strategically placed in prime receiving areas so players can challenge their throwing accuracy. As every coach knows, hitting various heights is important for any quarterback and the Football Target Net provides 3 prime receiving heights for developing this valuable skill. While a powerful arm is important, power without accuracy can hinder any player or quarterback, that's why the GoSports Football Target Net is such a valuable training aid for players and coaches alike.
