

# Linear LED Vaportight High Performance Luminaire Motion/ Photo Control Instructions

## LVTH4CL/WR (#99629) Motion/Photo Wireless Remote Control

### 1. Detection Coverage

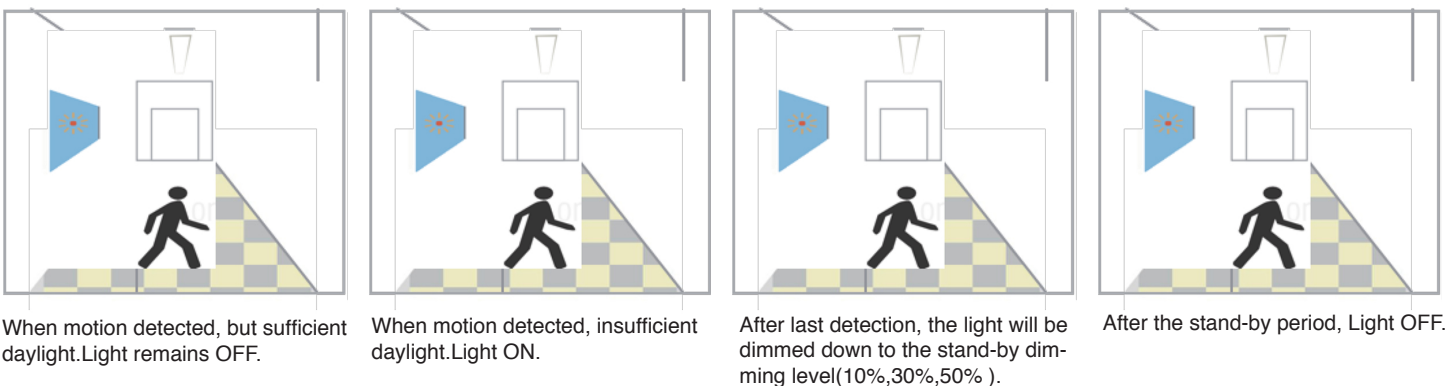

NOTE: Above detection coverage is recommended actual coverage may vary depending on luminaire configuration and environmental conditions

### 2. Operation

The LVTH4CL/WR requires 2AAA batteries for operation. To set parameters of the Motion/Photo Microwave sensor, the wireless remote control must be within 15 feet (4.5 meters). The LVTH4CL/WR can be used to directly control the Microwave Motion/Photo sensor that sensing the presence and movements of the occupants without requiring unobstructed line-of-sight. The Microwave Motion/Photo Sensor is integral to the Linear LED High Performance Vaportights with a "MC" designation in the product code.

### 3. Remote Control

#### ON/OFF function

Press the “ON/OFF” button, the light keeps permanently on or off.

\* Press “Auto Mode”, “RESET” or “Scene mode” buttons to quit from this mode

#### Auto Mode

Press “Auto Mode” button, the sensor starts to work and all settings remain the same before the light gets switched on/off.

#### Reset Function

Press “RESET” button, products with DIP switch will take DIP switch; otherwise all the setting will be initial, which is 100% detection range, hold time 5S, no stand-by time and daylight threshold disabled.

#### Test mode

The button “Test (2s)” is for testing purpose after commissioning. Pressing this button, the sensor goes to test mode (hold time is only 2s) automatically, stand-by period and daylight sensor are disabled. This mode can be ended by pressing “reset”, “Auto mode”, “scene mode” or “hold time”. The sensor setting is changed accordingly.

### Scene Mode

There are 4 scene modes fixed program built-in the remote control to choose for different applications:

Scene Selection	Detection Range	Hold Time	Stand-By Time	Stand-By Dimming Level	Daylight Sensor Value
SC1	100%	30s	60s	10%	2Lux (0.2 fc)
SC2	100%	5 min	10 min	10%	10Lux (1 fc)
SC3	100%	10 min	30 min	10%	50Lux (5 fc)
SC4	100%	30 min	+∞.	10%	Disable

Default Factory Settings are in Bold:

#### Detection Range

Press the buttons of “detection range” to set detection range at **100%** / 75% / 50% / 20%.

#### Hold Time

Press the buttons of “hold-time “ to set hold-time at **5s** / 30s / 1min / 3min / 5min / 10min / 20min/ 30min.

#### Stand-By Period (Corridor Function)

Press the buttons of “stand-by period” to set stand-by period at 0s / 10s / 30s / 1min / 5min / 10min / 30min / +∞.

**Note:** “0s” means on/off control; “+∞” means bi-level dimming control.

#### Stand-By Dimming Level

Press the buttons of “stand-by dimming level” to set the stand-by dimming level at 10% / 20% / 30% / 50%.

#### Daylight Sensor Value

Press the buttons of “daylight sensor” to set daylight threshold at 2Lux / 10Lux / 30Lux / 50Lux/ 80Lux / 120Lux / disable.

\*10 LUX = 1 footcandle (fc)
