

 Constructed of furniture board

**FURNITURE BOARD** is a composite of reclaimed and recycled wood products bonded together with a synthetic resin or binder under heat and pressure, commonly referred to as Particle Board or Engineered Wood.

**TRUSTED MATERIAL.** Furniture board is used for flooring, shelving, paneling, office furniture, household furniture, cabinets, countertops and many other products. It is a trusted material across a diverse range of industries.

**SAVINGS OVER PLYWOOD** cabinets cost less, kitchen remodeling dollars go further

**TEMPERATURE & HUMIDITY STABLE.** Durable, doesn't expand and contract going from dry to humid conditions; doesn't warp.
