

CITRISTRIP® Safer Paint & Varnish Stripping Gel is easy to use because it stays wet and active for up to 24 hours allowing stripping of multiple layers in one step. It removes five layers of dried latex paint in under one hour. It contains no methylene chloride or NMP (N-Methylpyrrolidone) and is safe for indoor use. This special orange stripper has a pleasant citrus scent. Use CITRISTRIP® to remove multiple layers of dried latex and oil-based paint, varnish, lacquer, polyurethane and shellac from wood, metal and masonry surfaces.

DIRECTIONS FOR USE:

1. Protect hands with chemical-resistant gloves and eyes with chemical splash goggles.
2. Shake well. Pour into a container and apply with a paint brush.
3. After 30 minutes (up to 24 hours), scrape a small test area to see if finish is ready for removal. For overnight stripping, after applying, cover application with plastic until ready to scrape. Gently scrape in direction of wood grain with a plastic stripping tool. For stubborn areas, use an abrasive stripping pad dipped into CITRISTRIP®. A toothbrush, toothpick or stripping brush will help remove old finish buried in recesses.
4. Use a paint stripper wash to loosen remaining residue and then mineral spirits to prepare surface for painting. Surface should be completely clean and dry before refinishing.

Helpful Tips: Test in an inconspicuous area before use on any synthetic surface as strippers can damage these surfaces. Do not use on fiberglass, plastic or vinyl. For best results, use in temperatures between 65° and 85°F and away from strong breeze and hot sun. Protect surrounding areas with a heavy plastic drop cloth.

Disposal: Dispose of in accordance with local, state and federal regulations.

CAUTION: CAUSES BURNS. Contains Benzyl Alcohol and surfactant. Do not mix with any other product. Avoid contact with eyes and prolonged contact with skin. Do not swallow. Contains a bittering agent to discourage accidental swallowing. If using indoors, open all windows and doors and maintain a cross ventilation of moving fresh air across the work area.

FIRST AID - IF SWALLOWED, call the Poison Control Center (1-800-222-1222), hospital emergency room or physician immediately for instructions. **IN CASE OF EYE CONTACT,** immediately flush with water, remove any contact lens; continue flushing with water for at least 15 minutes. If irritation persists, get medical attention. **IN CASE OF SKIN CONTACT,** irritation may result. Immediately wash with soap and water. If irritation persists, get medical attention.

KEEP OUT OF REACH OF CHILDREN.
