30.48 cm X 457.2 cm

TURF SEAM TAPE

- Professional grade
- Extra wide tape designed to bond the edges of artificial grass together
- Use with TrafficMASTER™ Turf Seam Glue

PROFESSIONAL GRADE

Spun-bonded polyester fibers ensure a strong bond

HASSLE-FREE PROCESS

Does not require a seaming iron

VERSATILE

For commercial, residential, indoor and outdoor applications of synthetic grass

For secure, permanent and undetectable artificial grass seams, use TrafficMASTER™ Seam Tape. When applied correctly, the TrafficMASTER seam tape and glue method permanently holds the edges of artificial grass together. Lay the seam tape where two edges of artificial grass meet and apply TrafficMASTER Seam Glue, sold separately, over the seam tape. Once the seams are fully bonded, they will be resistant to all weather conditions. Tape does not contain adhesive and must be used with the TrafficMASTER Seam Glue.
