Use and Care

1.Proper Operation:
- Ensure to operate the barn door according to the manufacturer's instructions.
- If the door has a sliding mechanism, gently push or pull the door to avoid excessive force or sudden movements.

2.Avoid Overuse:
- Barn doors are typically designed for light to moderate use. Avoid frequent opening and closing unnecessarily.

3.Keep Clean:
- Regularly check for dust or dirt on the door and use appropriate cleaner and a soft cloth for cleaning.
- Avoid cleaners with abrasive or harsh chemicals to prevent damage to the surface.

4.Safety Precautions:
- When operating the door, ensure the surrounding area is clear of obstacles to prevent interference with sliding or potential harm to items or people.

Maintenance Tips:

1.Lubrication:
- Periodically inspect and lubricate the door tracks and sliding components.
- Use suitable lubricants such as silicone lubricant or general-purpose machine lubricant to ensure smooth operation.

2.Inspection and Adjustment:
- Regularly inspect the overall condition of the door, including sliding tracks, door panels, and any fixed components.
- Adjust sliding tracks or door panels if necessary to maintain proper operation and sealing performance.

3.Repair and Replacement:
- If there are damages to door panels or issues with the sliding mechanism, contact professionals promptly for repair or replacement of parts.
