

How To Estimate Materials:

1. Diagram your fence including all gate locations. For each continuous run, mark starting points and ending points (see example to the right).
2. Write the measurements for each line in feet. Determine the section count by dividing each line on your diagram by 8 (always round up). Post spacing for Trex is 8 ft. on-center maximum. Write the section count next to each line.
3. Total the # of sections (this will give you the # of privacy kits to order).
4. Total the # of ending points.
5. Total the # of sections + # of ending points (this will give the # of posts w/post caps to order).

Total # of Posts w/Caps: _____

■ Total # of sections = # of privacy kits to order

■ Total # of sections + Total # of ending points = # of posts w/post caps to order

Privacy kit includes: 1-top rail; 1-aluminum bottom rail; 2-bottom rail covers; 19-pickets; 4-brackets; 24-screws. Posts w/post caps sold separately.
