

1. Identification

Product identifier Thermacell Mosquito Repellent Mat

US EPA Reg. No(s). 71910-2, 71910-8

CN PMRA Reg. Nos. 27878, 28367, 28368, 28834, 28835, 29107, 31738

Product No(s). (With units): MR-GJ, MR-LJ, MR-RJ, MR-XJ, MR450X, MR-CL, MR-CLC, MR-9SB,

MR-9L, MR-9W, MR-KA, MR-KB, MR-BP, MR-CLE, MR-CLB, MR-CLD, MR-BPR, MR-PSB, MR-PSG, MR-PSR, MR-PSL, MRD201, MRD202, MRD203, MR-300G, MR-300L, MR-300V, MR-TJ, MR-FJ (Refills): R1, R4, RB1, RB4, R5, R10, M24, M48,

R25, L4

**Recommended use** Mosquito repellent

children. Use only per label directions.

Company name Thermacell Repellents, Inc.

**Address** 26 Crosby Drive

Bedford, MA 01730

**Telephone** 866.753.3837

## 2. Hazard(s) identification

According to Regulation 2012 OSHA Hazard Communication Standard; 29 CFR Part 1910.1200

**Physical hazards** Not classified.

**Health hazards** Acute toxicity, oral - Category 4

Acute toxicity, inhalation - Category 4

**Environmental hazards OSHA defined hazards** 

Hazard symbol

Not classified. Not classified.

Signal word WARNING

Hazard statement

Harmful if swallowed. Harmful if inhaled.

**Precautionary statement** 

**Prevention** Wash hands thoroughly after handling. Do not eat, drink or smoke when using

this product. Use only outdoors or in a well-ventilated area.

**Response** If swallowed: Call a poison center/doctor if you feel unwell. Rinse mouth. If

inhaled: Remove person to fresh air and keep comfortable for breathing. Call a

poison center/doctor if you feel unwell.

**Storage** Store away from incompatible materials.

**Disposal** Dispose of contents/container in accordance with local/regional/national/

international regulations.

**Hazard(s) not otherwise** None known.

classified (HNOC)

**Supplemental information** None.

### 3. Composition/information on ingredients

## Hazardous component(s):

<u>Chemical name</u>	<u>CAS Number</u>	<u>Weight %</u>
d-Allethrin	231937-89-6	20% - < 25%
Distillates (petroleum), Hydrotreated light	64742-47-8	10% - < 15%
Other components below reportable levels*	n/a	60% - < 70%

<sup>\*</sup>Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

#### 4. First-aid measures

**Inhalation** Remove victim to fresh air and keep at rest in a position comfortable for

breathing. Call a POISON CENTER or doctor/physician if you feel unwell.

Skin contact Rinse skin with water. Get medical attention if irritation develops and persists. **Eye contact** 

Do not rub eyes. Rinse with water. Get medical attention if irritation develops

and persists.

**Ingestion** Rinse mouth. If vomiting occurs, keep head low so that stomach content doesn't

Direct contact with eyes may cause temporary irritation.

get into the lungs. Get medical advice/attention if you feel unwell.

**Most important** 

symptoms/effects, acute

and delayed

**Indication of immediate** medical attention and

special treatment needed

**General information** 

Provide general supportive measures and treat symptomatically. Keep victim

warm. Keep victim under observation. Symptoms may be delayed.

Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in

attendance.

### 5. Fire-fighting measures

Suitable extinguishing

media

media

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

**Unsuitable extinguishing** Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising

from the chemical

Special protective

equipment and precautions case of fire.

During fire, gases hazardous to health may be formed.

Self-contained breathing apparatus and full protective clothing must be worn in

for firefighters

Fire fighting equipment/

instructions

**Specific methods** 

Use water spray to cool unopened containers.

Use standard firefighting procedures and consider the hazards of other involved

materials.

**General fire hazards** No unusual fire or explosion hazards noted.

### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Methods and materials for containment and cleaning

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS. The product is immiscible with water and will spread on the water surface. Stop the flow of material, if this is without risk. Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For

waste disposal, see section 13 of the SDS. **Environmental precautions** Avoid discharge into drains, water courses or onto the ground.

## 7. Handling and storage

**Precautions for safe** handling

Do not taste or swallow. When using, do not eat, drink or smoke. Use only outdoors or in a well-ventilated area. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices. Use care in handling/storage.

including any incompatibilities

Conditions for safe storage, Store in original tightly closed container. Store in a well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS).

### 8. Exposure controls/personal protection

**Occupational exposure** 

limits

up

**Biological limit values Appropriate engineering** 

controls

This mixture has no ingredients that have PEL, TLV, or other recommended exposure limit.

No biological exposure limits noted for the ingredient(s).

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not

been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

**Eye/face protection** Wear safety glasses with side shields (or goggles). Skin protection Wear appropriate chemical resistant gloves.

Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment. Chemical

respirator with organic vapor cartridge.

Thermal hazards

General hygiene considerations

Wear appropriate thermal protective clothing, when necessary.

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work

clothing and protective equipment to remove contaminants.

## 9. Physical and chemical properties

**Appearance** 

**Physical state** Liquid absorbed on paper cardboard.

No hazardous decomposition products are known.

products

## 11. Toxicological information

Information on likely routes of exposure

Inhalation Harmful if inhaled.

Skin contact No adverse effects due to skin contact are expected. Direct contact with eyes may cause temporary irritation. Eye contact

**Ingestion** Harmful if swallowed.

Symptoms related to the

Direct contact with eyes may cause temporary irritation.

physical, chemical and toxicological characteristics

Information on toxicological effects

**Acute toxicity** In high concentrations, vapors are anesthetic and may cause headache, fatigue,

dizziness and central nervous system effects. Harmful if inhaled. Harmful if

swallowed.

<u>Components</u>	Species	Test Results
d-Allethrin	Rat	Acute Toxicity (Oral LD50): 900 mg/kg
(CAS 231937-89-6)	Rat	Acute Toxicity (Dermal LD50): > 2000 mg/kg
	Rat 4 hours	Acute Toxicity (Inhalation LC50): 3.875 mg/l
Distillates (petroleum), Hydrotreated	Rat	Acute Toxicity (Oral LD50): > 5000 mg/kg
Light (CAS 64742-47-8)	Rat	Acute Toxicity (Dermal LD50): > 5000 mg/kg
	Rat 8 hours	Acute Toxicity (Inhalation LC50): > 5000 mg/m3
		(Vapor)

Respiratory or skin sensitization

**Respiratory sensitization** Not a respiratory sensitizer.

Skin sensitization Not expected to cause skin sensitization.

**Germ cell mutagenicity** No data available to indicate product or any components present at

greater than 0.1% are mutagenic or genotoxic.

Not classifiable as to carcinogenicity to humans. **Carcinogenicity** 

Reproductive toxicity This product is not expected to cause reproductive or developmental

effects.

Specific target organ toxicity

- single exposure

Not classified.

Specific target organ toxicity

Not classified.

- repeated exposure

**Aspiration hazard** Not an aspiration hazard.

## 12. Ecological information

**Ecotoxicity** This product is toxic to fish and aquatic invertebrates. An environmental hazard

cannot be excluded in the event of improper handling or disposal.

Persistence and

degradability

Bioaccumulative potential

Mobility in soil

No data available.

No data available.

No data available.

## 13. Disposal considerations

**Disposal instructions** Collect and reclaim or dispose in sealed containers at licensed waste disposal

site. Dispose of contents/container in accordance with local/regional/national/

international regulations.

Local disposal regulations Hazardous waste code Dispose in accordance with all applicable regulations.

The waste code should be assigned in discussion between the user, the producer

and the Waste disposal company.

Waste from residues / unused products

Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emp

Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved

waste handling site for recycling or disposal.

### 14. Transport information

**DOT** Not regulated.

**IATA**Not subject to the provisions of this Code per special provision, SP A158. Sealed

packet contains less than 10 ml of an environmentally hazardous liquid, absorbed

into a solid material with no free liquid in the packet.

**IMDG** Not subject to the provisions of this Code per special provision, SP 335. Sealed

packet contains less than 10 ml of an environmentally hazardous liquid, absorbed

into a solid material with no free liquid in the packet.

### 15. Regulatory information

## **US federal regulations**

This is a pesticide product registered by the Environmental Protection Agency (EPA Reg. No. 71910-2 and 71910-8) and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels according to the Hazard Communication Standard. Following is the hazard information as required on the pesticide label:

**CAUTION:** Contains petroleum distillates. Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash hands thoroughly with soap and water after handling and before

eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

**If Swallowed:** Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

**If On Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**If In Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

29 CFR 1910.1200. This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Provide general supportive measures and treat symptomatically.

Ensure that medical personnel are aware of the material(s) involved. Show this safety data sheet to the doctor in attendance.

#### 5. Fire-fighting measures

Suitable extinguishing

media

**Unsuitable extinguishing** 

media

Specific hazards arising

from the chemical

**Special protective** 

equipment and precautions case of fire. for firefighters

Fire fighting equipment/

instructions

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

None known.

Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to

health may be formed.

Self-contained breathing apparatus and full protective clothing must be worn in

In case of fire and/or explosion do not breathe fumes. Isolate immediate hazard area and keep unauthorized personnel out. Stop spill/release if it can be done safely. If this cannot be done, allow fire to burn. Move undamaged containers from immediate hazard area if it can be done safely. Stay away from ends of container. Water spray may be useful in minimizing or dispersing vapors and to protect personnel. Cool equipment exposed to fire with water, if it can be done safely.

**Specific methods** Use standard firefighting procedures and consider the hazards of other involved

materials. Cool containers exposed to flames with water until well after the fire is

**General fire hazards** Extremely flammable gas. Contents under pressure. Pressurized container may

explode when exposed to heat or flame.

#### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep out of low areas. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Wear appropriate protective equipment and clothing during clean-up. Emergency personnel need self-contained breathing equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning

Stop leak if you can do so without risk. Use water spray to reduce vapors or divert vapor cloud drift. Isolate area until gas has dispersed. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material.

**Environmental precautions** Avoid discharge into drains, water courses or onto the ground.

### 7. Handling and storage

## **Precautions for safe** handling

Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Do not smoke. Turn device off after each use and when empty. Protect cartridges from physical damage; do not drag, roll, slide, or drop. Use only properly specified equipment which is suitable for this product. The use of hydrocarbon fuel in an area without adequate ventilation may result in hazardous levels of incomplete combustion products (e.g. carbon monoxide, oxides of sulfur and nitrogen, benzene and other hydrocarbons) and/or dangerously low oxygen levels. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices. Use care in handling/storage.

including any incompatibilities

Conditions for safe storage, Keep away from heat, sparks and open flame. This material can accumulate static charge which may cause spark and become an ignition source. Prevent electrostatic charge build-up by using common bonding and grounding techniques. Store in a cool, dry place out of direct sunlight. Store in original tightly closed container. Store in a well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS).

## 8. Exposure controls/personal protection

### **Occupational exposure limits**

**OSHA**

### 10. Stability and reactivity

Reactivity The product is stable and non-reactive under normal conditions of use, storage

and transport.

Material is stable under normal conditions. **Chemical stability** 

**Possibility of hazardous** 

reactions

No dangerous reaction known under conditions of normal use.

Conditions to avoid Avoid all possible sources of ignition. Heat will increase pressure in the cartridge. **Incompatible materials** 

Avoid contact with acids, aluminum chloride, chlorine, chlorine dioxide, halogens

and oxidizing agents.

**Hazardous decomposition** 

products

Not anticipated under normal conditions of use.

## 11. Toxicological information

#### Information on likely routes of exposure

Inhalation Unlikely to be harmful. Asphyxiant at high concentrations in confined spaces may

limit oxygen available for breathing.

Skin contact Skin contact is not anticipated.

Eye contact Direct contact with eyes is not anticipated.

Ingestion Ingestion is not anticipated.

Symptoms related to the

physical, chemical and

Light hydrocarbon gases are simple asphyxiants and can cause anesthetic effects

at high concentrations. Symptoms of overexposure, which are reversible if toxicological characteristics exposure is stopped, can include shortness of breath, drowsiness, headaches, confusion, decreased coordination, visual disturbances and vomiting. Continued

exposure can lead to hypoxia (inadequate oxygen), rapid breathing, cyanosis (bluish discoloration of the skin), numbness of the extremities, unconsciousness

and death.

### Information on toxicological effects

Acute toxicity

Components	Species	Test Results
Liquefied Petroleum Gas	Rat	Acute Toxicity (LC50): > 10,000 ppm (gas)

Respiratory or skin sensitization

**Respiratory sensitization** Not a respiratory sensitizer.

Skin sensitization Not expected to cause skin sensitization.

**Germ cell mutagenicity** No data available to indicate product or any components present at

Carcinogenicity

Reproductive toxicity

Specific target organ toxicity

- single exposure

Specific target organ toxicity

- repeated exposure

**Aspiration hazard** 

greater than 0.1% are mutagenic or genotoxic. Not classifiable as to carcinogenicity to humans.

Not expected to cause reproductive toxicity. Exposure of rats during gestation days 6-10 to concentrations of 1000, 5000, and 10,000 ppm liquefied petroleum gas did not result in fetal toxicity or abnormalities.

Not expected to cause organ effects from single exposure.

Not known to cause organ damage. A thirteen week inhalation study in which rats were exposed to liquefied petroleum gas at concentrations of 1000, 5000, and 10,000 ppm did not demonstrate adverse effects.

Not an aspiration hazard.

12. Ecological information

**Ecotoxicity** Petroleum gases will readily evaporate from the surface and would not be

expected to have significant adverse effects in the aquatic environment.

**Persistence and** 

degradability

**Bioaccumulative potential Mobility in soil** 

No data available. No data available.

No data available.

13. Disposal considerations

**Disposal instructions** Collect and reclaim or dispose in sealed containers at licensed waste disposal

site. Dispose of contents/container in accordance with local/regional/national/

international regulations.

Local disposal regulations

Hazardous waste code

Dispose in accordance with all applicable regulations.

The waste code should be assigned in discussion between the user, the producer

and the Waste disposal company.

Waste from residues /

unused products

Dispose of in accordance with local regulations. Empty cartridges may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

**Contaminated packaging** Since emptied containers may retain product residue, follow label warnings even

after container is emptied. Empty containers should be taken to an approved

waste handling site for recycling or disposal.

14. Transport information

**DOT** Limited Quantity for packages less than 30 kg (66 lb).

**IATA** 

**UN** number UN2037

UN proper shipping name Gas cartridges (flammable) without a release device, non-refillable

**Transport hazard class** 

Class 2.1 **Subsidiary risk** Packing group **ERG Code** 115

**IMDG** Not subject to the provisions of this Code per special provision, SP 191.

Receptacle with a capacity not exceeding 50 mL containing only non-toxic

constituents.
