

# Ultrasonic Dry Misting Fan

Remote Control

Three Fan Speeds

Powerful Speakers

Mosquito Repellent

Oscillating and Tilt Fan

Anion Ionizer

**Bluetooth  
Technology**

**100% Non-Toxic  
Mosquito Repellent!**

From the Makers of

***“The first fan you’ll ever love and the last fan you’ll ever need!”***

## **Features & Benefits**

**Built-In Speakers**

**Bluetooth Compatible**

**Water Tank for Misting Ability**

**Mosquito Repellent**

**Cooling Breeze**

**Remote Control**

**LCD Display**

**Ionizer to Purify the Air**

**Aromatherapy Dispenser**

**Indoor & Outdoor Use**

***The CoolZone CZ500 Ultrasonic Dry Mist Misting Fan by SUNHEAT is designed to keep you cool and comfortable during the hot season with many beneficial features. Dry environments can lead to dehydration and accelerated aging. The misting function uses ultrasonic high frequency oscillation principles to atomize the water into 1-5 micron ultra-fine particles. The water is then diffused into the air leaving you cool and hydrated, but not feeling wet.***

***For an even cooler breeze, simply freeze the included polar packs and add one to the water tank. Sterilize your air by using the anion function, which utilizes a pulse and a high oscillation circuit to produce corona and oxygen molecules. If using indoors, electronic thermal sensors detect the temperature and display it for easier use. When outdoors, use the mosquito repellent to keep disease carrying pests away.***

***Connect your device to the fan via USB port or Bluetooth Technology to enjoy music from the built in speakers.***

***Wheels on the unit make it simple to transport between rooms or move from outside to inside throughout the year. A remote control is included for convenient and easy use.***
