PRODUCT DESCRIPTION

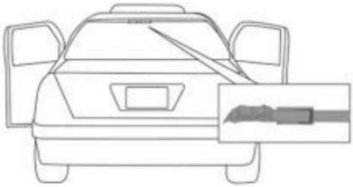

INSTALLATION INSTRUCTIONS FOR 700MM SOFT ROOF RACKS:

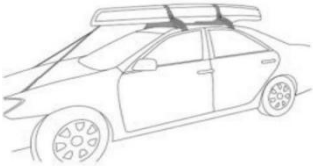

STEP 1: Open all doors. Ensure the roof surface is clean and dry to prevent damages.

STEP 2: Place one rack across the car above the front doors as close to the front of the roof as possible. Install the second rack above the rear doors. (If possible, we recommend that the distance between the racks be 27-3/5 inches).

STEP 3: Route the straps inside the vehicle and buckle them together with the ratchet. Pull hard to tighten the strap. Any excess straps should be tied up to avoid noise.

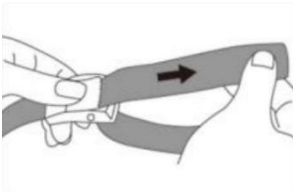

STEP 4: Center the load on the soft roof racks. Use the heavy-duty straps to secure it. Use ropes to tie the ends of long items to the front and rear of the vehicle. Once the load is on, check all straps and retighten if needed.

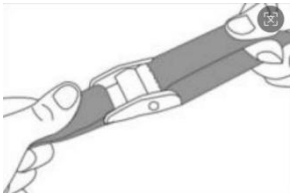

INSTRUCTIONS FOR ACCESSORIES 15FT HEAVY-DUTY TIE DOWN STRAP:

1.Open the ratchet buckle and put the strap in the right place.

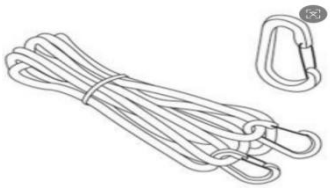

2.Always go through the ratchet buckle from bottom to top.

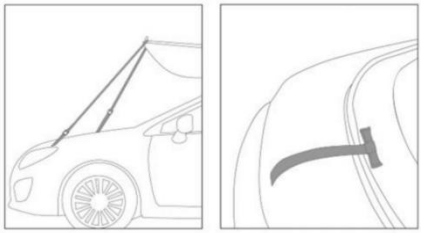

3.Pull hard to fasten the strap but do not over-tighten.

FT Bow and Stern Tie Down Rope

Hook the rope to an anchor point (such as the kayak toggle handles, hood or trunk loop, the front bumper beam , tow hook, the rear bumper beam, trailer hitch, etc.). Tighten the rope. NOTE: In some cases, you may need to adjust the length of the rope. Please fasten the knots securely.

QUICK LOOP STRAP

Simply open your hood or trunk. Position the loop where you want it and then close it. The quick loop locks in place under pressure,providing a quick and easy loop to lash your straps.When used together with the tie -down ropes, it secures the bow and stern in place.
