

Material Safety Data Sheet

BAYER ADVANCED ALL-IN-ONE ROSE & FLOWER CARE CONCENTRATE

MSDS Number: 102000012163
 MSDS Version 2.0
 Revision Date: 09/01/2005

SECTION 1. CHEMICAL PRODUCT AND COMPANY INFORMATION

Product Name BAYER ADVANCED ALL-IN-ONE ROSE & FLOWER CARE CONCENTRATE
MSDS Number 102000012163
EPA Registration No. 72155-21
Product Use Insecticide for use against insects & diseases providing protection against the major problems of Roses, Hibiscus, Iris and other Flowers and Shrubs.

Bayer Environmental Science
 2 T.W. Alexander Drive
 Research Triangle PK, NC 27709
 USA

For MEDICAL, TRANSPORTATION or other EMERGENCY call 1-800-334-7577 (24 hours/day)
 For Product Information call 1-800-331-2867

SECTION 2. COMPOSITION/INFORMATION ON INGREDIENTS

<u>Hazardous Component Name</u>	<u>CAS-No.</u>	<u>Average % by Weight</u>
Imidacloprid	138261-41-3	0.15
Tebuconazole	107534-96-3	0.80

SECTION 3. HAZARDS IDENTIFICATION

NOTE: Please refer to Section 11 for detailed toxicological information.

Emergency Overview Caution! Avoid contact with skin, eyes and clothing. Moderate eye irritation

Physical State slightly viscous liquid

Routes of Exposure Ingestion, Eye contact, Skin contact

Immediate Effects

Eye Avoid contact with eyes. Moderate eye irritation

Skin May cause slight irritation. Avoid contact with skin and clothing.

SECTION 4. FIRST AID MEASURES

General Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Material Safety Data Sheet

MSDS Number: 102000012163
MSDS Version 2.0

**BAYER ADVANCED ALL-IN-ONE ROSE & FLOWER CARE
CONCENTRATE**

Eye	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
Skin	Take off all contaminated clothing immediately. Rinse immediately with plenty of water for at least 15 minutes. Call a poison control center or doctor for treatment advice.
Ingestion	Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless directed to do so by a physician or poison control center. Never give anything by mouth to an unconscious person. Do not leave victim unattended.
Inhalation	Move to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
Notes to Physician Treatment	There is no specific antidote. Appropriate supportive and symptomatic treatment as indicated by the patient's condition is recommended.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point	> 93.3 °C / > 199.9 °F Method: Setaflash
Suitable Extinguishing Media	foam, dry chemical
Fire Fighting Instructions	Keep out of smoke. Fight fire from upwind position. Dike area to prevent runoff and contamination of water sources. Equipment or materials involved in pesticide fires may become contaminated. Wear self contained breathing apparatus for fire fighting if necessary. Wear full protective suit.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions	Keep unauthorized people away. Isolate hazard area. Avoid contact with spilled product or contaminated surfaces.
Methods for Cleaning Up	Take up with absorbent material (e.g. sand, earth or a proprietary absorbent material). Keep in suitable, closed containers for disposal. Clean contaminated floors and objects thoroughly, observing environmental regulations.

Material Safety Data Sheet

**BAYER ADVANCED ALL-IN-ONE ROSE & FLOWER CARE
CONCENTRATE**

MSDS Number: 102000012163
MSDS Version 2.0

Additional Advice Do not allow material to enter streams, sewers, or other waterways or contact vegetation. Use personal protective equipment.

SECTION 7. HANDLING AND STORAGE

Handling Procedures Read label carefully before use.

Storing Procedures Do not freeze. Store in a cool, dry secured storage area. Store in original container and out of the reach of children, preferably in a locked storage area.

SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

General Protection There are no known hazards associated with this product when used according to the label directions. At the same time, the following guidelines should be used.

Avoid inhalation of vapour or mist. Avoid contact with skin and eyes.

Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

Do not allow children and pets to enter the treated area until it has dried.

Eye/Face Protection protective eyewear.

Body Protection Wear long-sleeved shirt and long pants and shoes plus socks.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State slightly viscous liquid

pH 6.5 - 8.0

Density ca. 1.37 g/cm³ at 20 °C

Viscosity 400 - 1,000 mPa.s at 25 °C

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability Stable

SECTION 11. TOXICOLOGICAL INFORMATION

Acute toxicity studies have not been performed on this product as formulated. The acute toxicology

Material Safety Data Sheet

MSDS Number: 102000012163
MSDS Version 2.0

BAYER ADVANCED ALL-IN-ONE ROSE & FLOWER CARE CONCENTRATE

information provided below is from a similar formulation containing a higher percentage of the active ingredient, tebuconazole and the same percentage of the active ingredient, imidacloprid. The non-acute information pertains to the two active ingredients.

Acute Oral Toxicity male/female rat: LD50: > 5,000 mg/kg

Acute Dermal Toxicity male/female rat: LD50: > 5,000 mg/kg

Acute Inhalation Toxicity male/female rat: LC50: > 2.76 mg/l
Exposure time: 4 h
Determined in the form of liquid aerosol.
Maximum attainable concentration.
No deaths
(actual)

male/female rat: LC50: > 11 mg/l
Exposure time: 1 h
Determined in the form of liquid aerosol.
Extrapolated from the 4 hr LC50.
(actual)

Skin Irritation rabbit: Mild skin irritation

Eye Irritation rabbit: Moderate eye irritation

Sensitization guinea pig: Non-sensitizing

Subchronic Toxicity **TEBUCONAZOLE TECHNICAL**
In a 3 week dermal toxicity study, rabbits treated with tebuconazole showed no local or systemic effects at levels up to and including 1000 mg/kg, the limit dose.

In a 3 week inhalation study, rats exposed to tebuconazole exhibited liver enzyme effects at the highest concentration tested (155.8 mg/m³).

IMIDACLOPRID TECHNICAL
In a 3 week dermal toxicity study, rabbits treated with imidacloprid showed no local or systemic effects at levels up to and including 1000 mg/kg, the limit dose.

In a 4 week inhalation study, rats exposed to high concentrations of imidacloprid exhibited decreased body weight gains and changes in clinical chemistries and organ weights.

Chronic Toxicity **TEBUCONAZOLE TECHNICAL**
In chronic dietary studies in rats and dogs treated with tebuconazole, effects on the liver, spleen, adrenals and/or eyes occurred at high doses.

IMIDACLOPRID TECHNICAL
In chronic dietary studies in rats and dogs exposed to imidacloprid, slight effects on the thyroids and/or liver were observed at high doses.

Material Safety Data Sheet

MSDS Number: 102000012163
MSDS Version 2.0

**BAYER ADVANCED ALL-IN-ONE ROSE & FLOWER CARE
CONCENTRATE**

Assessment Carcinogenicity

TEBUCONAZOLE TECHNICAL

Tebuconazole gave no evidence of a carcinogenic potential in an oncogenicity study in rats, however, in a study using mice there was an increased incidence of hepatocellular neoplasms at a dose level approximately three-fold greater than the maximum tolerated dose (MTD).

IMIDACLOPRID TECHNICAL

In oncogenicity studies in rats and mice, imidacloprid was not carcinogenic in either species.

ACGIH

None.

NTP

None.

IARC

None.

OSHA

None.

**Reproductive &
Developmental Toxicity**

TEBUCONAZOLE TECHNICAL

REPRODUCTION: In a two generation study in rats treated with tebuconazole, smaller litters and decreased pup body weights were observed in conjunction with maternal toxicity at the highest concentration tested (1000 ppm).

DEVELOPMENTAL TOXICITY: Tebuconazole produced teratogenic effects in conjunction with maternal toxicity in mice and rabbits via oral and/or dermal exposure. When tested in the rat, developmental effects were observed in conjunction with maternal toxicity via oral exposure. Teratogenic effects were not observed in the rat following either route of exposure.

IMIDACLOPRID TECHNICAL

REPRODUCTION: In a two generation reproduction study in rats, imidacloprid was not a primary reproductive toxicant. Offspring exhibited reduced body weights at the high dose and in conjunction with maternal toxicity.

DEVELOPMENTAL TOXICITY: In developmental toxicity studies in rats and rabbits, there was no evidence of an embryotoxic or teratogenic potential for imidacloprid. In both species, slight developmental effects were observed only at high doses and in conjunction with maternal toxicity.

Neurotoxicity

TEBUCONAZOLE TECHNICAL

In an acute oral neurotoxicity screening study in rats, tebuconazole produced transient neurobehavioral effects without correlating morphological changes in neural tissues.

In a subchronic dietary neurotoxicity screening study in rats, tebuconazole did not produce any neurobehavioral symptoms or any microscopic lesions in neural tissues or skeletal muscle.

Material Safety Data Sheet

MSDS Number: 102000012163
MSDS Version 2.0

**BAYER ADVANCED ALL-IN-ONE ROSE & FLOWER CARE
CONCENTRATE**

In a one-generation developmental neurotoxicity study in rats, dietary concentrations of tebuconazole administered to the dams during gestation and lactation did not cause any specific neurobehavioral effects in the offspring. Clinical signs of toxicity, as well as, developmental toxicity were observed in the offspring, but only in conjunction with maternal toxicity.

IMIDACLOPRID TECHNICAL

In acute and subchronic neurotoxicity screening studies in rats, imidacloprid produced slight neurobehavioral effects in each study at the highest dose tested. There were no correlating morphological changes in the neural tissues in either study.

In a one-generation developmental neurotoxicity screening study in rats, offspring exposed to imidacloprid showed decreased body weights and motor activities. These effects occurred only at the highest dose tested and in conjunction with maternal toxicity. There were no correlating morphological changes observed in the neural tissues.

Mutagenicity

TEBUCONAZOLE TECHNICAL

Numerous in vitro and in vivo mutagenicity studies have been conducted on tebuconazole of which were negative.

IMIDACLOPRID TECHNICAL

The imidacloprid mutagenicity studies, taken collectively, demonstrate that the active ingredient is not genotoxic or mutagenic.

SECTION 12. ECOLOGICAL INFORMATION

**Environmental
Precautions**

Highly toxic to aquatic invertebrates. Do not apply directly to water. Do not contaminate surface or ground water by cleaning equipment or disposal of wastes, including equipment wash water.

SECTION 13. DISPOSAL CONSIDERATIONS

General Disposal Guidance It is best to use all of the product in accordance with label directions. If it is necessary to dispose of unused product, please follow any applicable state or local guidelines. Never place unused product down any indoor or outdoor drain. Refer to the product label for other disposal instructions.

Container Disposal Do not re-use empty containers. Place empty container in trash.

SECTION 14. TRANSPORT INFORMATION

TRANSPORTATION CLASSIFICATION:
Not regulated for transportation

FREIGHT CLASSIFICATION:
Insecticides or Fungicides, N.O.I.; other than poison
