AIR CONDITIONER

INVERTER SEER 17 FAMILY

Wide voltage operation

Using advanced voltage adaptation technology, operate normally between 130V-270V, which is suitable for unstable areas of the power grid.

Energy saving

Using high efficiency compressor, it can save 30-40% energy compared with fixed frequency ones (low standby power, low frequency operation close to set temperature).

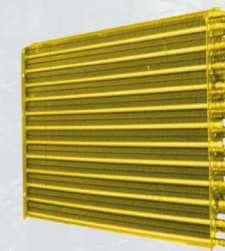

Long-distance air flow

The air-flow distance could reach 15m.
(the highest level in the market is just 12m)

Golden Fin

Golden Fin is more resistant to oxidation and corrosion than ordinary blue fins of most condensers.

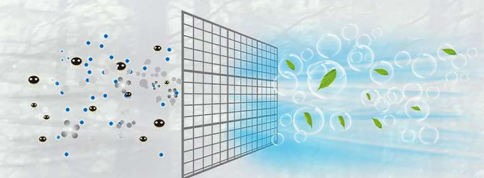

Wifi 2.0(OPTIONAL)

USB wifi, easy for installation with high efficiency and convenience.

High density filter(OPTIONAL)

Adding the fix points to minimize the gap between filter and body, to realize a better dust-proof performance.
