

# RADON IN WATER TEST KIT

**Important Note: PLEASE FOLLOW THE DIRECTIONS CAREFULLY. Save the directions and mailing tubes. You will need them to send your samples to our laboratory at the completion of the sampling.**

**NOTE: You will need a pair of pliers or other similar tool to perform this test.**

**IMPORTANT! RECORD AND SAVE THE DETECTOR SERIAL NUMBERS:**

Serial Numbers: #           #

### DIRECTIONS

1. Choose a faucet that is closest to your home or office water inlet and remove the aerator (if present) with pliers by turning it counter-clockwise. To avoid scratching the aerator, you may want to use a cloth rag between the pliers and the aerator. Turn on the **cold** water and allow it to run for 3-5 minutes. For accurate results, thoroughly flush the water system before sampling or take the water samples immediately following prolonged water use, such as a shower or laundry. While you are waiting for the water to purge, uncapp the two (2) Radon Gas sample vials.

2. Hold a large clean bowl (gallon size) or similar container up to the faucet and slowly fill until it overflows the top of the bowl. Turn off the faucet. For accurate results, the faucet outlet must be below the water surface with **no** air bubbles in the water for at least two minutes).

3. Quickly submerge one of the sample vials and cap into the water as deeply as possible. Immediately cap the filled sample vial while still underwater, making sure that there are no air bubbles inside the sample vial. **Repeat this step for the second sample vial.**

4. Hold each sample vial upside down and check for air bubbles. If bubbles are present, dump the sample out and repeat step 3 until there are no visible air bubbles. (Test results will be compromised if air bubbles are present).

### STANDARD LAB RESULTS (Results available within 7 business days)

Mail back your completed payment form, test location form and the two (2) Radon Gas sample vials in the mailing tubes within 24 hours for analysis in the pre-paid postage envelope provided. Your test results will be ready within seven (7) business days after **PRO-LAB** has received your Radon Gas sample vials. You may view and print your test results online at [www.prolabinc.com/results](http://www.prolabinc.com/results). First Class mail delivery is not guaranteed. If you need faster delivery we recommend you use **UPS, FEDEX or Express Mail.**

### EXPRESS SERVICE (Results available within 2 business days)

In order to use the express service you must send the sample vials, with the proper payment and test location form within 24 hours after completing the test to **PRO-LAB** using an overnight shipping envelope provided by a carrier such as FedEx or UPS. Express samples can only be received Monday – Friday. Within two (2) business days after **PRO-LAB** has received your sample vials you can view and print your results online at [www.prolabinc.com/results](http://www.prolabinc.com/results).

*\*Special Note: New Jersey residents must add an additional \$20.00 fee - made payable to PRO-LAB. PRO-LAB is required to pay an Administrative Fee to the NJDEP for Radon Tests conducted in New Jersey.*
