Air Purifier | CADR: 218 m³/hour

INSTRUCTION MANUAL

ProBreeze

Air Purifier | CADR: 218 m3/hour

WARNING

- Use the appliance only as described in the instruction manual.
- Never unplug the appliance from the mains until it has been switched off.
- Never operate if there are signs of damage to the cord, plug or appliance.
- Do not place the appliance or accessories in a wet or damp place.
- Avoid placing power cord in areas where it can become a tripping hazard.
- Avoid using extension cables as they may overheat and cause a fire risk.
- Keep all air inlets and outlets free from blockages.
- Do not place the appliance too close to other objects.
- Never place anything on top of the appliance.
- Do not cover the appliance whilst in use.
- This appliance is not a toy. Never leave unattended around children or pets.
- Do not use the appliance near a heating source.
- Unplug the appliance and store in a cool and dry place when not in use.
- Only use on the voltage specified on the product safety label.
- Never use the appliance without the filter installed correctly.
- Do not attempt to repair or adjust any electrical or mechanical elements in the unit. Doing so may be unsafe and will void your warranty.
- Do not use outdoors.
- To reduce the risk of electric shock, this equipment has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact qualified personnel to install the proper outlet. Do not alter the plug in any way.

CAUTION: This equipment should be inspected frequently and collected dirt removed from it regularly to prevent excessive accumulation that may result in flashover or a risk of fire.

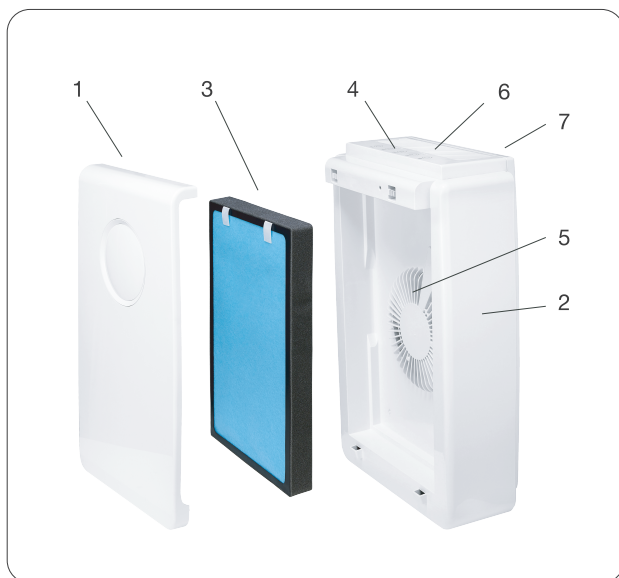

HOW IT WORKS

The Pro Breeze Air Purifier removes up to 99.97% of dust, bacteria and allergens from the air. It is fitted with a composite filter made up of 4 individual filters, and a negative ion generator, helping you to create an invigoratingly clean living or working space.

1. Pre-filter: Traps large contamination particles such as human and pet hair.
2. True HEPA filter: Captures airborne particles as small as 0.3 micron such as dust, pollen, mold spores and airborne mites.
3. Activated Carbon Filter: Removes unwanted odours and harmful gases such as formaldehyde and benzene.
4. Cold Catalyst Filter - A final guard to trap any remaining impurities.
5. Negative ion generator: Releases negative ions into the air to eliminate air-borne bacteria and contaminants.

FEATURES

- 1 Front Panel
- 2 Main Body
- 3 Composite Filter *
- 4 Control Panel
- 5 Air intake
- 6 Air outlet
- 7 Handle

* Model number - PB-P01F

SPECIFICATIONS

- Size: 540 x 325 x 170 mm
- Weight: 4.9 kg
- Effective Area: Up to 40 m² / 430 ft²
- Voltage: 120V AC 60Hz
- Input Power: 55W
- Clean Air delivery Rate (CADR) - 218m³/h

CONTROLS

ON/OFF

SPEED

IONS

TIMER

SLEEP

Power Button - Turns the unit on and off.

Fan/Air Speed -

1. Low 2. Mid 3. High

Ion - Turns the negative Ion generator on and off

Timer - Sets an Auto-On or Shut-Off timer, 1H , 2H or 4H.

- Setting an Auto-On timer: When the unit is off, tap the timer button until you reach the desired number of hours before you want it to turn on. The numbered light will light up and after 2 seconds the timer will begin. When the desired time has elapsed, the air purifier will switch on.
- Setting an Auto-Off timer: When the unit is on, tap the timer button until you reach the desired number of hours required before it turns off. The numbered light will light up and after 2 seconds the timer will begin.

Sleep - Press to send the display to sleep. The unit will continue working on the low fan mode but the lights will turn off.

REPLACING THE FILTER

We recommend cleaning the filter with a vacuum cleaner once a month, and replacing it once a year or every 5000 hours of use. After 5000 hours of use, the sleep button will flash continuously as a reminder to replace the filter. After you have fitted a new filter, hold the sleep button down for 5 seconds to reset the timer.

Instructions:

1. Remove the front panel of the air purifier by holding the upper part of the panel and lifting upwards and away from the unit.
2. Remove the composite filter by pulling the two tabs at the top of the filter.
3. Ensure that the new filter is fitted in the same direction with the blue side and pulling tabs facing outwards.
4. Reattach the front panel filter.

Replacement filter model number: PB-P01F

CLEANING & MAINTENANCE

Cleaning the unit: Use a soft cloth with water and a mild detergent to wipe down the outer surfaces.

Cleaning the filter: To extend the lifespan of the filter, a vacuum cleaner can be used to remove dust from the surface of the filter.
