**Indoor
Plant Care**

I'm Home!

Born in Florida, for the last 12 months I've been raised on the best soil, food, and water by more than 100 humans who love me dearly. Help me settle into my new home by placing me in bright, indirect light. Spoil me with loving care, and watch me grow.

MY FAVORITE THINGS

LIGHT: Medium bright indirect sunlight

TEMPERATURE: I enjoy lounging indoors in 45° to 85° F but keep me away from cold drafts, air conditioning or heating vents, and hot surfaces like radiators or furnaces

HUMIDITY: I prefer humidity levels of at least 50%. Mist me daily using a spray bottle of distilled water if the air is dry.

WATER: Allow my soil to dry out slightly between watering's but please don't give me too much to drink - my roots will thank you!

FOOD: Feed me half-strength houseplant fertilizer monthly during spring and summer

WE  **BEING LOVED**
AS MUCH AS OUR PLANTS DO

*THANK YOU
FOR YOUR
PURCHASE*

We work hard to help you have the best plant parent experience possible.

Sometimes however, extreme temperature changes and rough handling during a journey can damage a living plant. If you're not happy with your plant on arrival, please let us make it right before submitting a review.

**NOT WHAT YOU EXPECTED?
LET US MAKE IT RIGHT BEFORE
POSTING A REVIEW**

1. Take a photo of the plant as it arrived.
2. Send the photo, order information and concerns to care@unitednursery.com
3. A member of our team will get back to you within 1 business day.
