- **Enhances Grass Germination**
Protects seed and retains moisture
- **Protects New Masonry From Stains**
Place around foundation to prevent mud splatter

**WEED
FREE**

6 FT X 100 FT Roll

SIMPLE APPLICATION

Prepare soil and apply starter fertilizer and seed per package recommendations (fertilizer and seed sold separately).

Spread blanket over the prepared seed bed, while walking side up. Use sharp scissors to trim blanket to size.

Biodegradable stakes are recommended. Use every 2 ft to secure blanket to the ground.

Water the blanket thoroughly after installation. Continue to water twice per day at least 15 minutes until all seeds have begun to grow.

Mow within the first month after seeds grow, cutting no more than 1/2 of the grass height. Blanket will naturally degrade.
