

Croton

Croton Petra is native to South Asia and the Western Pacific Islands. This woody-based perennial can grow to 5 ft. tall - 6 ft. tall but will make an excellent container plant to any sun-drenched patio. Croton Petra is the perfect plant for you if you are looking to use houseplants to make a high-impact statement in your indoor decor. Most croton varieties have variegated foliage boldly marked with outrageous shades of orange, red, yellow, and purple. Great item for decorating in Fall this item will make a perfect addition to any home or office.

- Easy to care low maintenance item
- Crotons love bright light; place on porches, patios and when indoors, place in any room receiving bright direct sunlight; crotons will thrive in a room with full sun and bright light
- Water crotons when the soil starts to dry, drain any excess water, they also can benefit from frequent misting, the croton is a tropical plant and enjoys humidity
