

Curb low profile roof flashing - ECL

**10-year
installation
warranty**

VELUX flashing required
to qualify.

ECL flashing

ECL step flashing provides a weathertight seal for standard site-built curbs installed on roofs with thin roofing materials such as asphalt or fiberglass shingles.

3 layers of water protection.

- 1** A pre-attached skylight gasket provides a tight seal between a standard site-built curb and the skylight that caps off a leak-proof installation for curb mounted skylights.
- 2** Adhesive underlayment for secondary water protection against the harshest weather conditions for standard site-built curbs.
- 3** Engineered flashing for easy installation and primary water protection.

ECL shingle or ECW tile flashing must be purchased in order to qualify for the 10-year installation warranty.

The No Leak Skylight™

• No Leak Promise • No Worries
