

ASSEMBLY INSTRUCTIONS PRE-LIGHTED TREES

1. Before assembling your tree, choose a location near a wall outlet. Be sure the surface is level.

2. Insert the bottom section of the stand (A) into the tree stand, and make sure the trunk stays straight. Insert the middle section of tree body (B) into the bottom of tree body (C), then insert the top section of tree body (A) into the middle section of tree body (B).

3. Open all the branches.

4. When shaping the branches start with the farthest from the pole. One to the right, one to the left, and one at the center of the main stem.

5. Do not illuminate until tree is fully assembled and all extension cords inside the tree is connected.

6. Connect the plug (A1) of string with the end cord (B1) of string. Connect the plug (B1) of string with the end cord (C2) of string.

7. Carefully insert the bottom section of the tree pole into the stand. Make sure pole is firmly base to the stand and screws tightened. Then insert middle section into bottom and top into middle.

8. After the plugs are plugged into the wall outlet your tree should be lit. If some bulbs do not light, search for any loose plugs, broken, loose or missing bulbs that may have caused the problem.

9. This product is for indoor use only.
