

**USE AND CARE GUIDE**

**4 in. LED PORTABLE TASK LIGHT**

**THANK YOU**  
We appreciate the trust and confidence you have placed in Commercial Electric through the purchase of this LED portable task light. We strive to continually create quality products designed to enhance your home. Visit us online to see our full line of products available for your home improvement needs. Thank you for choosing Commercial Electric!

**Safety Information**

Carefully read and understand the information in this manual before you operate this LED portable task light. Failure to do so could lead to a malfunction of the product or personal injury.

- CAUTION:** Do not stare directly into the LED portable task light when it is turned on as the LED portable task light is designed to have a high brightness mode.
- CAUTION:** Do not puncture, damage or dismantle the LED portable task light, and replace battery.
- CAUTION:** Do not use LED portable task light in humid environments or when your hand is wet.
- CAUTION:** Keep the LED portable task light away from fire, erosive materials, corrosive and/or explosive gas, and chemical, medical and electronic devices, including magnetized data devices; hot steaming areas, as damage can occur.
- CAUTION:** Use the micro USB charging cable for 1A with appropriate DC5V 1A charger.
- CAUTION:** The battery works on between 32°F (0°C) to 113°F (45°C), working outside the temperature may cause malfunction.
- CAUTION:** Do not use the LED portable task light when it is charging.
- CAUTION:** Avoid dropping the LED portable task light as damage to the PC cover, the end cap, the magnet or other electronic components can occur.
- CAUTION:** Test the magnet on the adsorption platform before applying, as not every kind of ferrous metal is suitable for magnet such as aluminum, in order to avoid damage to the LED portable task light.
- CAUTION:** Check the surfaces for applying the light as potential scratches from the magnet may occur.

**Safety Information (continued)**

- WARNING:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- NOTICE:** Prolonged usage of the LED portable task light may increase the temperature of the LED portable task light. This is normal and will not cause damage to the LED portable task light or hurt the user.
- NOTICE:** A very short light flash may appear when the LED portable task light is being charged. This is a normal sign and is part of the software control.
- NOTICE:** To maintain the proper functionality of the LED portable task light, it is recommended to charge it once every three months, failing to do that may shorten the battery life and reduce its planned capacity.
- NOTICE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.
- NOTICE:** This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions:
  - (1) This device may not cause harmful interference, and
  - (2) This device must accept any interference received, including the interference that may cause undesired operation.

**Limited Warranty**

The manufacturer warrants this product to be free from defects in materials and workmanship for a period of one (1) year from date of purchase. This warranty applies only to the original consumer purchaser and only to products used in normal use and service. If this product is found to be defective, the manufacturer's only obligation, and your exclusive remedy, is the repair or replacement of the product at the manufacturer's discretion, provided that the product has not been damaged through misuse, abuse, accident, modifications, alterations, neglect or mishandling. This warranty shall not apply to any product that is found to have been improperly set-up or used in any way not in accordance with the instructions supplied with the product. This warranty shall not apply to a failure of the product as a result of an accident, misuse, abuse, negligence, alteration, or faulty installation, or any other failure not relating to faulty material workmanship. The manufacturer specifically disclaims any liability and shall not be liable for any consequential or incidental loss or damage, including labor/expense costs involved in the replacement or repair of said product.

**Pre-operation**

**SPECIFICATIONS**

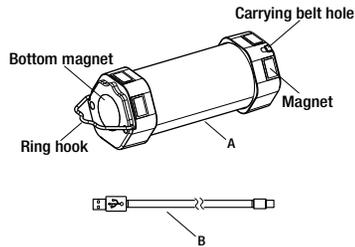

<b>Body</b>	4 in. (100 mm) handheld PC tube with PC and ABS end cap with embedded magnet casing
<b>LED</b>	10 pcs, 6000 K
<b>Wattage</b>	Less than 1.5 W
<b>Beam angle</b>	105°
<b>Micro USB Charging Cable</b>	11.8 in. (300 mm) micro USB charging cable (Max. 1A)
<b>Li-ion battery (embedded in tube)</b>	Lithium Ion 2000 mAh, 70% efficiency after 300 full-cycle recharges
<b>Charger (not included)</b>	DC5V 1A

**Pre-operation (continued)**

Lumens, Runtime [test under 77°F (25°C)], and Charging Time

Model NCL10-20						
Mode	High	Mid	Low	Strobe	SOS	Charging
Lumens	120 Lm	60 Lm	12 Lm	N/A	N/A	N/A
Runtimes (hours)	4-5	8-9	40-42	8-9	8-9	2.5-3.5

**PACKAGE CONTENTS**

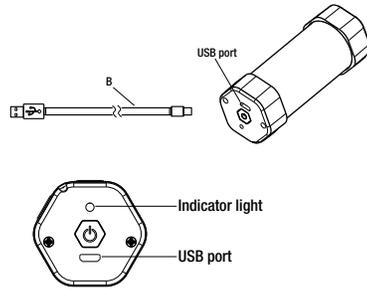

Part	LED Portable Task Light	Quantity
A	Handheld tube	2
B	Micro USB Charging Cable	1

**Operation**

**1 Charging the LED portable task light**

- The low power red indicator light illuminates when the battery is less than 10% charged.
- Connect the micro USB charging cable (B) to the micro USB charger port on the LED portable task light using an appropriate DC5V 1A charger.
- The recharging status indicator light is red during charging.
- LED portable task light turns green when fully charged.

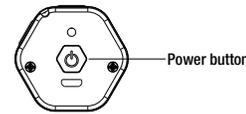

**INDICATOR LIGHT STATUS**

Indicator	Status
Low power	Orange light <10%
	Red flash <30%
	Orange flash <60%
	Green flash <99%
Undercharging	Green light 100%

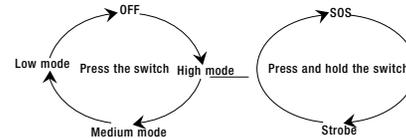

**2 Turning on the LED portable task light**

- Press the power button to turn on the LED portable task light in high mode.

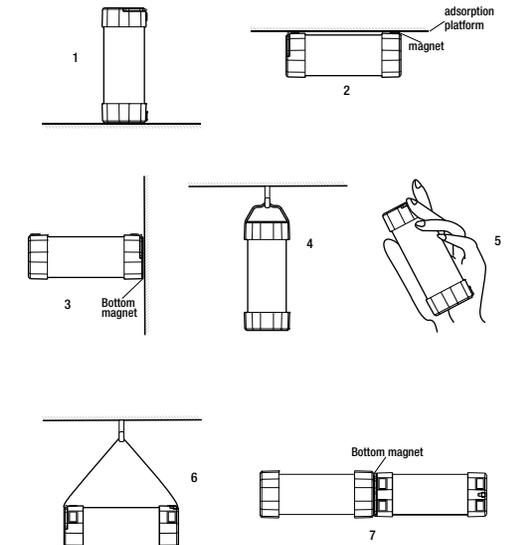

**3 Changing the LED portable task light modes**

- Press the power button once to turn the LED portable task light to high mode, twice for medium mode, and three times for low mode.
- Press and hold the power button for 2 seconds to turn on the strobe and hold 2 more seconds to start the SOS mode. These functions are available in all brightness modes.
- Press the power button once to return to high mode when using the strobe or SOS functions.

**4 Positioning the LED portable task light**

## Operation (continued)

Position	Description
1	Stand upright.
2	Stick onto adsorption platform using the embedded magnets. A 60 degree up and down adjustment is allowable by using the second set of magnets built into the end cap.
3	Stick onto adsorption platform using the embedded magnets at the back of the end cap.
4	The built in hook at the end of the end cap can be used to hang freely anywhere with appropriate fixture.
5	Move freely in any hand-held position.
6	The side hole and ring hook can be used for the carrying belt.
7	Two bottom magnetic bases may be adhered to each other, but not in the same direction.

## Care and Cleaning

- Wipe the LED portable task light with a piece of white tissue or soft cloth when dirty.
- Avoid spraying water on the LED portable task light and the micro USB charging port.

## Troubleshooting

Problem	Possible Cause	Solution
The body of the LED portable task light has some small and light scratches.	Though LED portable task light body is made with hard PC and anti-glare material, it is still subject to scratches.	Handle the LED portable task light body with care.
There are cracks in the magnet.	LED portable task light may have been dropped.	Protect the end cap when using and handling the LED portable task light.
There are scratches in the light.	LED portable task light may have been dropped or stored with another product that has sharp edges.	Handle the LED portable task light body with care.
LED portable task light does not switch on.	The battery level is low.	Check the low battery indication light. If the indicator light is on, charge the LED portable task light.
LED portable task light is becoming dimmer than normal standard.		
The recharging time is longer than the normal charging hours described in this manual.	The charger is incorrect.  The micro USB charging cable cannot accept 1A current.	Check whether the charger is DCSV 1A. If the charger is lower than 1A, it is normal for the charging time to be longer.  Check the micro USB charging cable for 1A current capability. If the cable cannot handle 1A current, replace with a different cable with that capacity.

## Troubleshooting (continued)

Problem	Possible Cause	Solution
LED portable task light becomes hot.	LED portable task light is operating outside of the normal temperature range.	If the temperature of the body is higher than 122°F (50°C) under normal working conditions, return the LED portable task light for a replacement if it is still within the warranty period.
LED portable task light does not work under very cold conditions.	The battery is cold.	Warm the LED portable task light to above 32°F (0°C).
LED portable task light requires more charging time and has a shorter runtime after a period of usage.	The battery life is depleted.	LED portable task light will function at 70% capacity with longer charging times and shorter runtimes. If this interferes with the performance you need for the LED portable task light, purchase a new light.
The indicator light continues to flash in one color and does not turn into the correct color as indicated. The light does not change green even after 4 hours of charging time.	The micro USB charging cable is loose.  The indicator light is out of order.	Tighten the micro USB charging cable or replace with a new one.  If the LED portable task light is within the warranty period, return the LED portable task light for a replacement.
The surface is scratched after removal of the light.	The magnet or end cap may have a rough surface that scratched the adsorption platform.	Do not apply the light in the surfaces that require protection.
