

Solid Vinyl Screen Door Tips & Information

FEATURE
Cuts Just Like Wood

The vinyl material retains the workability of wood. Trim using a standard circular saw.

TIP
Durable & Easy to Clean

Nothing fights the elements like a solid vinyl screen door. No painting or sealing required. Simply clean with standard household cleaner and your door will stay looking new.

FEATURE
Simple Rescreening

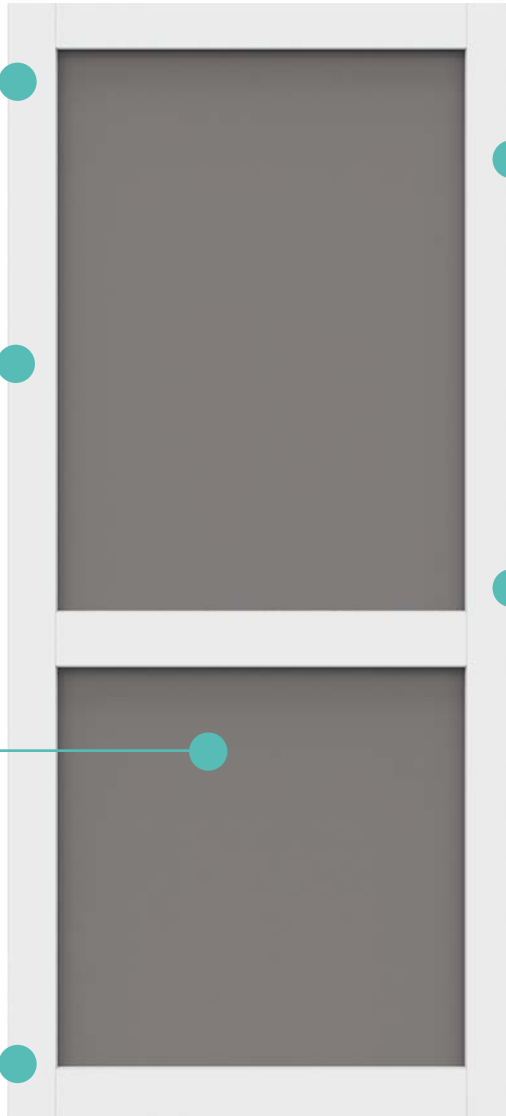

If you need to tighten or replace the screen, simply use .155 - .175 spline and fiberglass screen.

FEATURE
Welded Joints

The corners of your doors are welded together to prevent sagging.

TIP
No Painting Required

PVC materials are paintable. However, the nature of this door is not favorable for painting and will void the warranty.

FEATURE
Door Swing & Movement Control

Screen Tight hinges are spring-loaded so that your door will automatically close. For additional movement control you can optionally install a *pneumatic door closer* or a *spring-loaded screen door catch* (sold separately).

FEATURE
Reversible Handing

Your door hardware can be installed for right or left-handed use.

TIP
Install a Door Sweep

A door sweep (sold separately) covers the gap between the bottom of your door and floor to keep bugs from sneaking through.

TIP
Buy Replacement Parts Online

If you need to replace any part of your door, simply visit [ScreenTight.com](https://www.screentight.com).

**3 YEAR
WARRANTY**

Free of charge, with proof of purchase, during the first three years of ownership, Screen Tight at its discretion will supply parts for repair or replace any door determined to have a manufacturing defect. This warranty does not cover screen, hardware or misapplication of product.
