

Lifetime Fixture Warranty

When properly installed by professionals and under normal conditions of use, our fixtures are warranted to be free from defects in materials and workmanship for the life of the item in its original installed location. This warranty only applies to the original purchaser. Warranty may not be transferred to any other party. All modifications void our warranty. Improper installation also voids our warranty.

Light Bulbs & Integrated Lamping Warranty

On some fixtures we include light bulbs or integrated lamping. The bulbs are provided as a courtesy to make sure the fixture can be installed to look the way we designed it. For removable bulbs, we only guarantee 500 hours use. Our integrated (hard-wired in) LED lamping is warranted for five years, parts and labor only (covering both the driver and the LEDs when separate components) if installed and used properly. Use of a non-approved dimmer will greatly shorten the life of these components and violates this warranty.
