

# LG WashTower™ Pre-Delivery Cheat Sheet

## STEP 1 | Watch the Measure First Video

The video explains how to **Walk the Path** to ensure the unit will fit through doorways and can be properly moved into the designated space. It also covers how to determine fuel type and required accessories.

## STEP 2 | Confirm the Customer's Fuel Type

### Gas Requirements

### Electric Requirements

**IMPORTANT!** For Electric Dryers, customers need to know whether they have a 3-prong or a 4-prong outlet to purchase the correct cord. Most electric power cords are 4-6 ft long. Be sure to purchase a cord long enough to reach from the top of the dryer to the outlet.

## STEP 3 | Confirm All Required Accessories Have Been Purchased

Click your Model type to view required accessories and the Customer Checklist.

### Gas Models

#### With Steam Dryer

WKGX201HBA  
WKGX201HWA  
WSGX201HNA

#### Without Steam Dryer

WKG101HVA  
WKG101HWA

### Electric Models

#### With Steam Dryer

WKEX200HBA  
WKEX200HWA  
WSEX200HNA

#### Without Steam Dryer

WKE100HVA  
WKE100HWA

# LG WashTower™ Customer Checklist
