3 Pump Installation

Align the pump (Item 4) suction hose with the hole in the garden stand and secure the pump with two screws (Item 5).

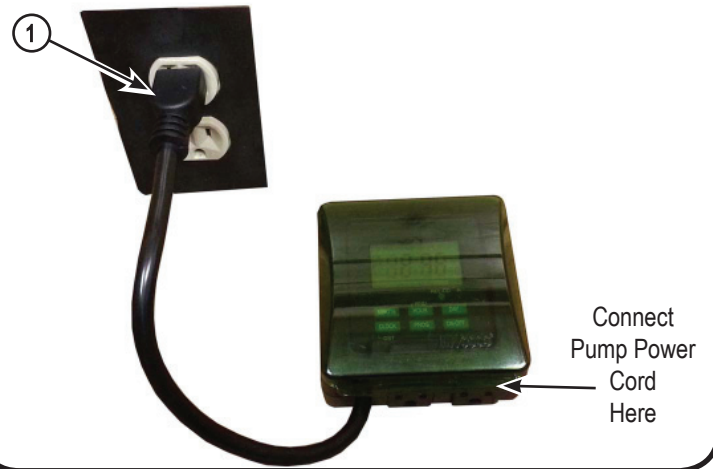

Route the pumps power cord through the garden bed as shown.

5 Timer Installation

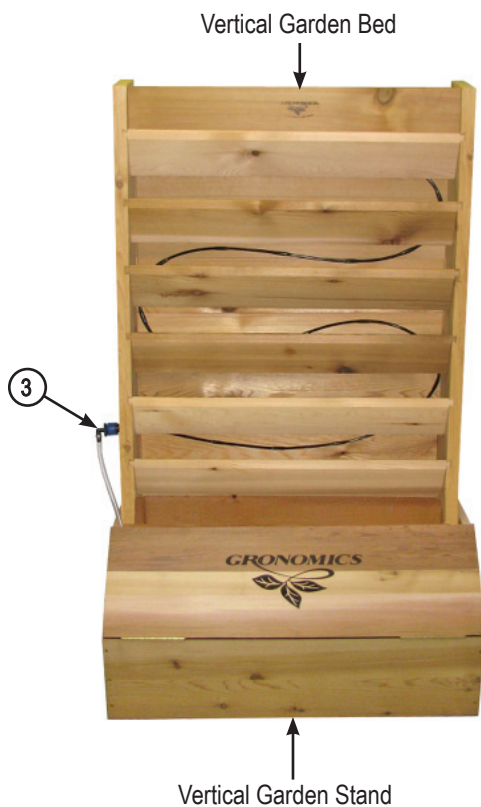

Connect the timer (Item 1) to a power source and connect the pump power cord to the timer.

NOTE: See instructions supplied with the timer for programming the timer.

4 Supply Hose Connection

Connect the supply hose threaded connector (Item 3) to the hose connector on the garden bed.

6 Soil Mix

NOTE: Before adding the soil mix, verify that the vertical garden stand is secure and stable. Verify that all back rails and shelf rails are completely installed.

CAUTION: When filling the vertical garden with soil mix, support the irrigation tubing while filling. This will help prevent damage to the irrigation tubing.

Slowly place the soil mix into the top of the vertical garden. Add soil mix until it is approximately one inch below the top back and shelf rails.
