

10-169 / 10-170

The 10-169, Loop Pile Seam Roller, was specifically designed for seaming loop pile and berber carpets. The 4 inch wide star wheels maximizes hot melt transfer into carpet, resulting in stronger seams. Can also be used for hooking carpet to tackstrip.

The 10-170, Cut Pile Seam Roller, offers a 4 inch smooth roller head which forces carpet backing into seaming tape without fraying yarn ends. This roller was designed for safe seaming of cut pile carpets, saxonomies and vinyl seams.

Both rollers feature an extended, angled soft grip handle for better leverage.
