

RainMachine™

The Forecast Sprinkler

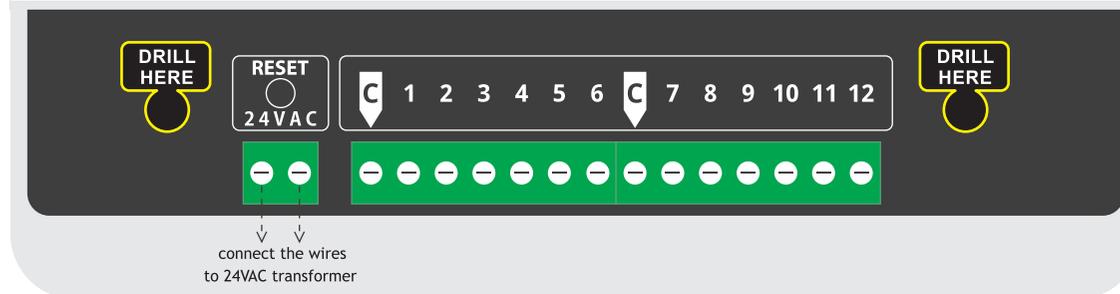

Easy installation guide

- 1 Fastening unit**
- Place template on the wall.
 - Mark and drill through the holes labeled as "DRILL HERE".
 - Using provided screws, fasten the unit to the wall.

- 2 Electrical**
- Connect your valve wires to the green terminal (see below).
 - NOTE: all valves share 2 Common terminals marked with the letter "C".
 - You can use up to 6 valves on a single common.

- 3 Power up**
- Connect the 24VAC power to the terminals marked "24VAC".
 - Plug transformer into AC wall socket.
 - System will boot and launch the setup wizard.

- 4 Setup**
- Setup wizard will walk you through WI-FI and address setup steps.
 - Congratulations! Your unit is up and running!
