

Genie®

CORRECT LARGE FILTER BAG INSTALLATION:

1. Unlatch power head from tank and remove.
2. Unfold large filter bag. Slide opening as far as it will go over the inlet port on the inside of the tank.
3. Place filter bag around the interior of the tank and spread out bag. Make sure bag position will not interfere with the assembly of the power head to the tank.
4. Place power head on tank and latch securely.
5. Use for dry pick-up only.

INSTRUCTIONS FOR TANK WITHOUT FILTER RETAINER GUIDE

1. Grasp cardboard collar firmly and slide rubber guard onto inlet fitting as firmly as possible.
2. When securely in place, expand and position bag around inside of tank.
3. Use for DRY PICK-UP ONLY.

INSTRUCTIONS FOR TANKS WITH FILTER RETAINER GUIDE

1. Unlatch power head from tank and remove. Keep standard filter in place.
2. Unscrew locking-ring and remove hose from inlet.
3. Remove deflector from retainer guide.
4. Make sure curve of the deflector is in a downward position, slide collector bag collar over deflector matching notches of collar to tabs on deflector.
5. Slide deflector with collector bag attached into retainer guide.
6. Reinsert hose into inlet and tighten locking-ring.
7. Use for dry pick-up only.
