

Durable PVC Jacket

The image shows a close-up of the end of a black cable. The cable is cut to reveal four internal conductors. Each conductor consists of a central copper wire surrounded by a thin layer of insulation. The insulation colors are red, teal, white, and black. The copper wire is visible in the center of each conductor. A line points from the text 'Durable PVC Jacket' to the outer black sheath of the cable.

100% Copper Wire

A line points from the text '100% Copper Wire' to the copper wire of the first conductor (red insulation).

10 Gauge Wire

A line points from the text '10 Gauge Wire' to the copper wire of the second conductor (teal insulation).

30 Amp Capacity
